IL GRUPPO MARGARITELLI

MARGARITELLI GROUP

Margaritelli è oggi un grande Gruppo che opera in diversi settori industriali. Un successo costruito intorno alla passione per l'innovazione tecnologica che da più di cent'anni si tramandano i componenti della famiglia Margaritelli.

È infatti il 1870 quando Eugenio Margaritelli si specializza nella produzione di utensili meccanici per l'agricoltura e le lavorazioni forestali.

I vari ambiti di lavoro del Gruppo - che spaziano oggi dai pavimenti in legno all'arredamento di interni, dalle traverse ferroviarie alle barriere di sicurezza e antirumore per opere stradali, fino ai veicoli industriali a marchio Merker - sono saldamente uniti da forti valori comuni condivisi da tutti gli uomini Margaritelli.

Margaritelli is today a large multi-business Group that operates in different industrial sectors.

A success constructed around the passion for technological innovation that for more than a hundred years hands down

to the components of the Margaritelli family. In fact in the year 1870 Eugenio Margaritelli specializes in the production of mechanical

utensils for agriculture and forestry manufacturing. The various sectors of the Group - doors, wood panelling, bathroom furnishings,

outdoor products, road and noise reduction barriers, railway sleepers and even industrial vehicles - are based on common and universal values shared by all the Margaritelli men.

L' AZIENDA E LA SUA MISSION

THE COMPANY AND ITS MISSION

178 million Euro turnover (invoice)
9 production plants
700.000 mq of industrial surface.*

Le soluzioni in legno per l'arredo di interni rappresentano il core business del Gruppo Margaritelli. In questo ambito i pavimenti in legno rivestono ad oggi il ruolo di protagonisti. Attraverso un articolato portafoglio di marchi e prodotti ed una coerente strategia di canale, Margaritelli è in grado di soddisfare i diversi segmenti del mercato con un'offerta di straordinaria qualità e completezza. Listone Giordano è il marchio leader; sinonimo di tecnologia e prestigio, ha affermato nel mondo il concetto di parquet a due strati divenendo il riconosciuto punto di riferimento dei pavimenti in legno di alta gamma. Il polo produttivo di Miralduolo (Perugia) nasce nel 1970 per svolgere le lavorazioni finali di Listone Giordano (assemblaggio, finitura, selezione, fino allo stoccaggio in un nuovissimo magazzino robotizzato, che gestisce oggi l'intera produzione). Alla collezione di pavimenti in legno, Margaritelli ha affiancato nuove proposte di impiego del legno per una varietà di applicazioni progettuali. Attraverso le linee Boiserie e B:room il marchio Listone Giordano si è affermato con successo anche nel settore arredamento riuscendo a fondere il proprio patrimonio di competenze tecniche a quei valori estetici che hanno reso celebre nel mondo il design made in Italy.

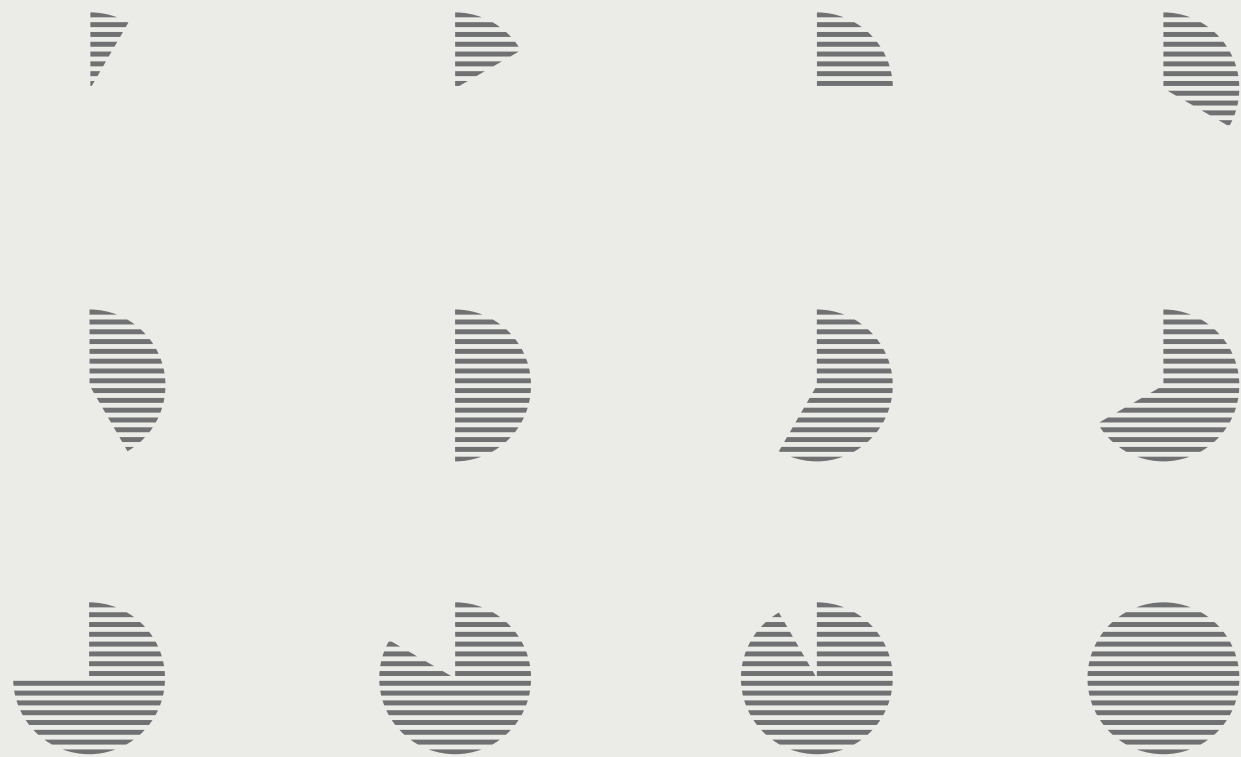

Solutions in wood for interior furnishing represent the core business of the Margaritelli Group. Wooden floors take centre stage. Through an articulated portfolio of brands and products and a coherent distribution strategy, Margaritelli is able to satisfy the various segments of the market with extraordinary quality and diversity. Listone Giordano is a leading brand name, a consolidation of the two-layer construction concept of hardwood flooring around the world, synonymous with technology and prestige and an easily identifiable reference for superior wooden floors. The plant in Miralduolo of Torgiano in Umbria was built in 1970; it is dedicated to more technologically and sophisticated working processes that conclude the production cycle of Listone Giordano and is considered a role model for the automation and organisation of factories. Margaritelli has supplemented its collection of hardwood floors with a new proposal for wood usage for a wide range of applications in the architectural word. Through Boiserie and B:room projects, Listone Giordano brand is now successfully associated with the world of furniture. As a result, inherent technical knowledge has become united with cultured values that have made Italian products famous the world over.

Per estendere anche al sistema distributivo quella costante ricerca di qualità che accompagna il prodotto fin dalla selezione della materia prima in foresta, Margaritelli, a partire dal 1995, ha intrapreso un innovativo progetto commerciale ispirato al franchising che ha portato in pochi anni alla creazione di oltre 650 punti vendita nel mondo (Parigi, Londra, Barcellona, Città del Messico, Shanghai, New York, Pechino, etc.), tutti dedicati al parquet, e caratterizzati da una forte immagine coordinata a marchio Listone Giordano. Tra i punti di forza del nuovo concetto di vendita spiccano gli evoluti sistemi espositivi per la presentazione e spiegazione dei prodotti, l'articolato sistema di comunicazione e marketing e l'innovativa gamma di servizi al cliente.

To extend the Company's quality commitment through a distribution channel that starts with the selection monitoring of raw material from the forests, Margaritelli since 1995 has embarked upon an innovative commercial franchising programme that has brought in few years to the creation of over 650 specialised hardwood - flooring retailers in the world (such as Paris, London, Barcelona, Mexico City, Shanghai, New York, Beijing, etc.) all devoted to the parquet, and characterized by a strong image coordinated to mark Listone Giordano. Some of the most important aspects of the programme include the evolution of in-store product display systems, articulated communication and marketing concepts and innovative customer services.

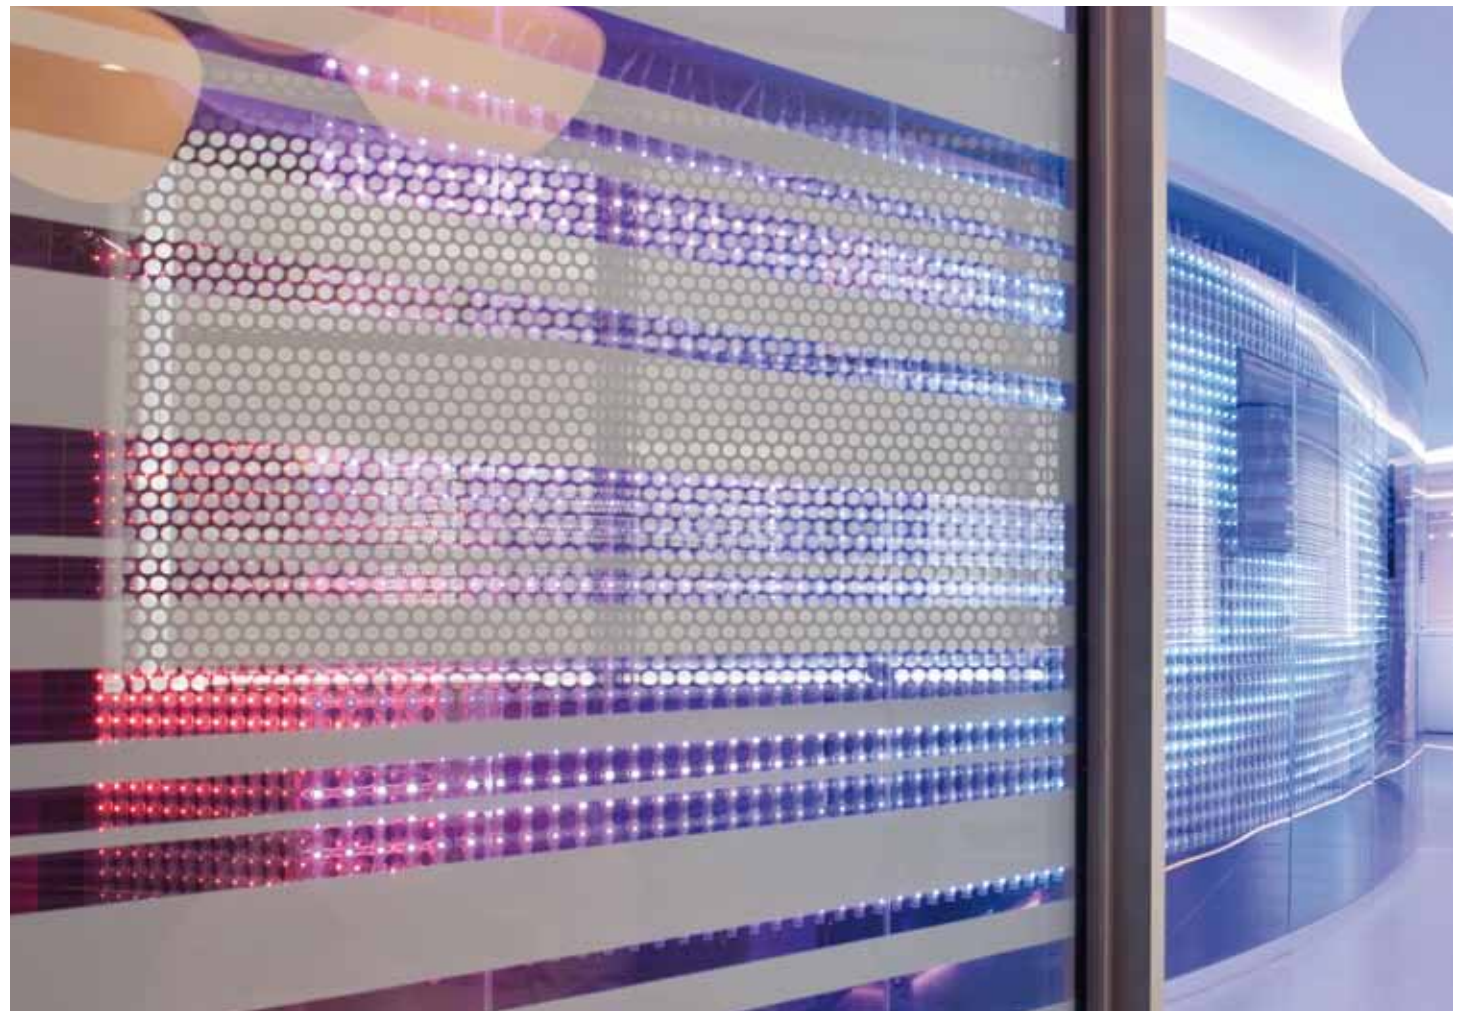

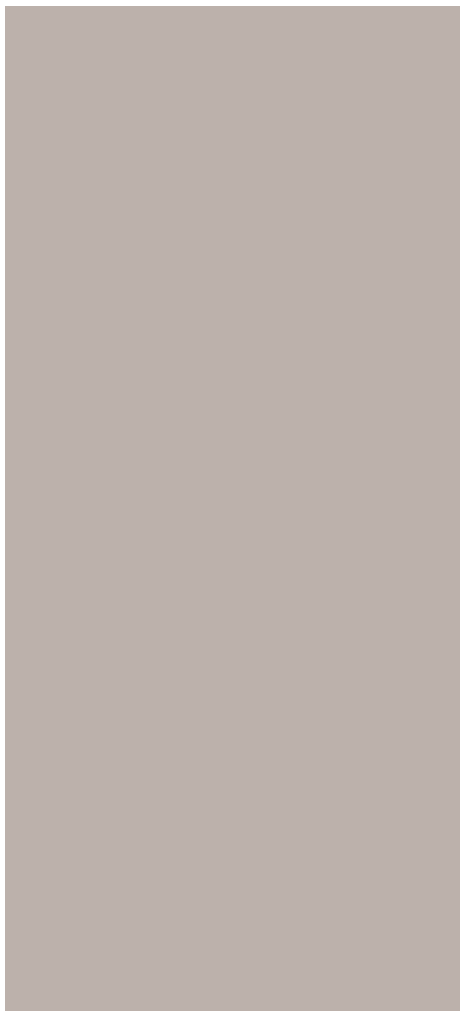

DIVISIONE CONTRACT
CONTRACT DIVISION

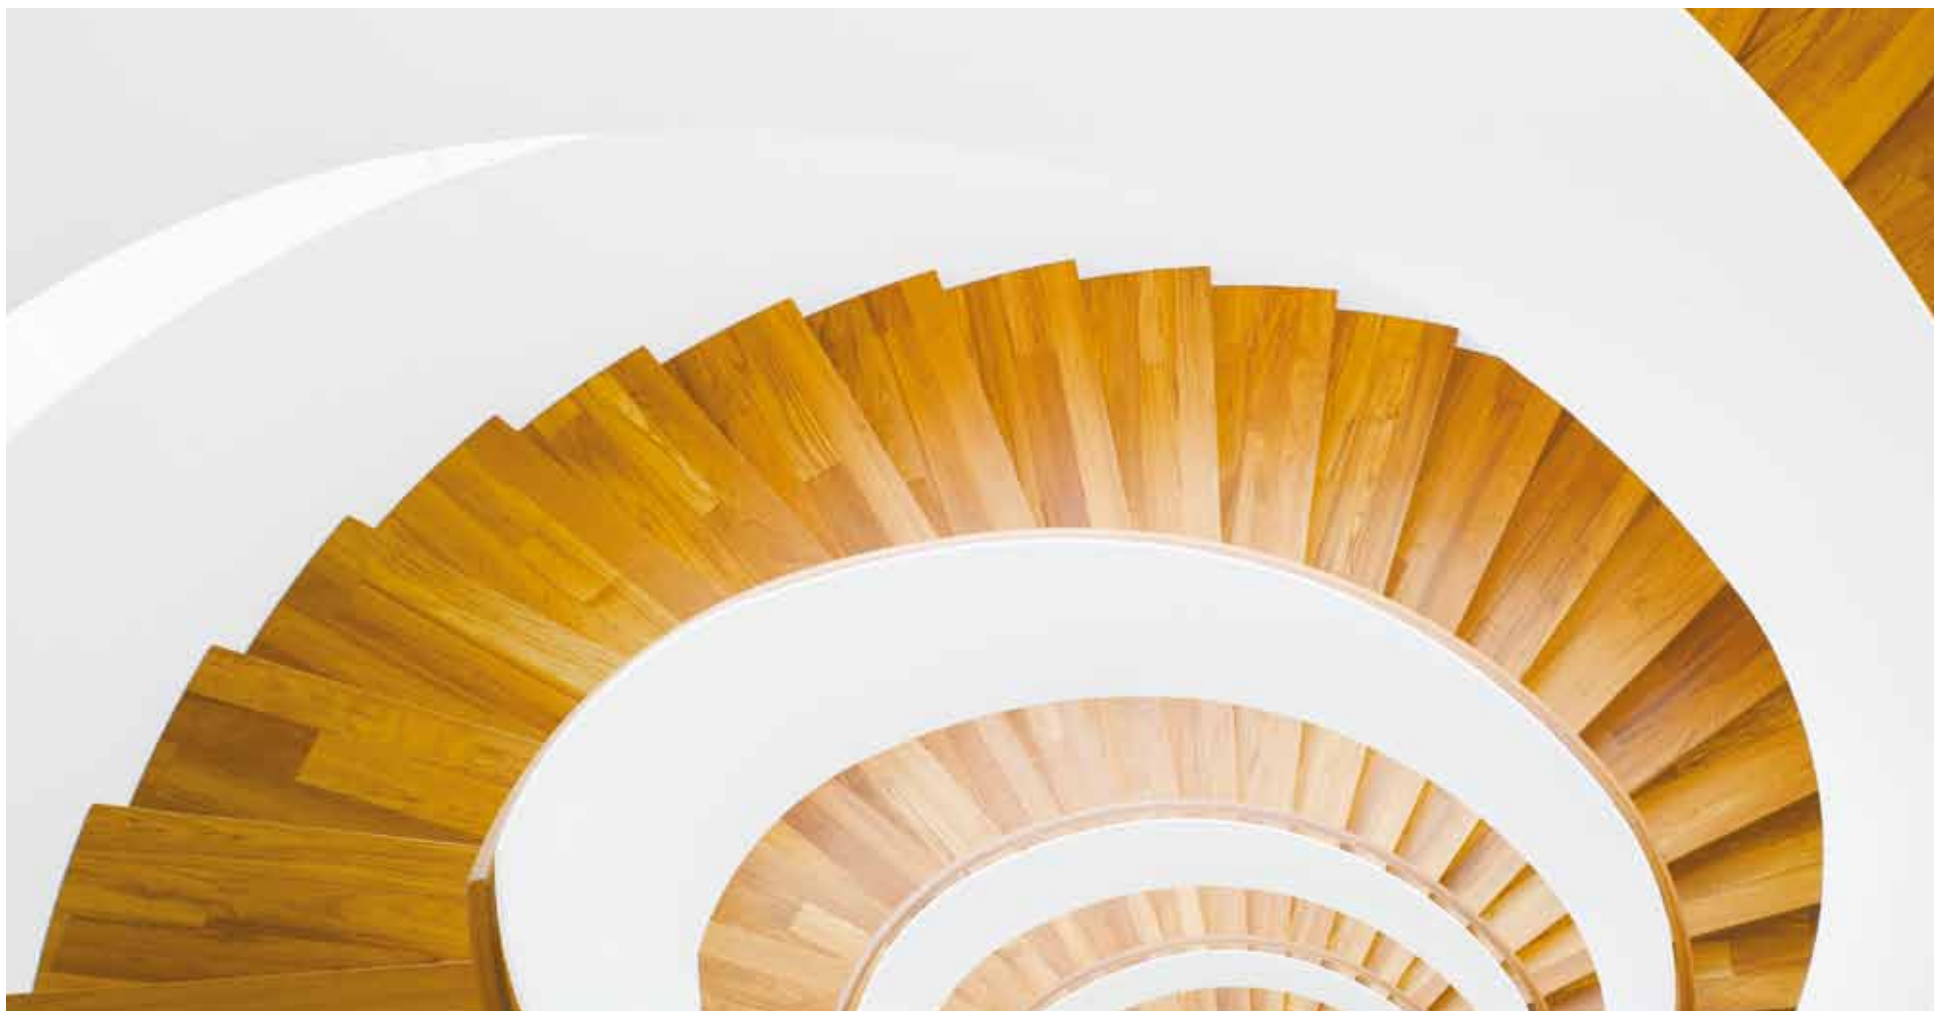

Nel 2000 nasce la divisione Listone Giordano Contract che sviluppa e realizza progetti e prodotti pensati per gli spazi contemporanei. Struttura autonoma, che opera in maniera integrata con gli altri dipartimenti aziendali del Gruppo e in sintonia con le proprie filiali in Europa, Nord America e distributori selezionati in circa trenta Paesi, con i quali condivide risorse, organizzazione di base e un sistema di servizi collegati. Ricerca industriale e sperimentazione in laboratorio. Innovazione e grande flessibilità produttiva. Luogo del progetto e della produzione dove i processi di lavorazione evoluti, la continua ricerca della perfezione e il costante controllo dei livelli qualitativi, convivono con il sapere artigianale acquisito in oltre cento anni di “cultura del legno”.

In the year 2000, the Listone Giordano Contract division was established to develop and implement projects and products for contemporary architectural areas. It is an independent structure, which operates with the other company departments in an integrated way. It is in close contact with the branch offices in Europe, North America and with selected distributors in about 30 different countries, which share resources, a based organization and a system of linked services. Industrial research and laboratory experimentations. Innovation and large productive flexibility. Location of the project and of the production where the evolution working processes, the continuous research for perfection and the constant control of the qualitative levels, are coupled together with the acquired artisan knowledge in over 100 years of the “culture of wood”.

IL CONTRACT SECONDO
LISTONE GIORDANO
CONTRACT ACCORDING TO
LISTONE GIORDANO

Listone Giordano Contract Division opera con successo in diversi ambiti legati ai progetti di grande dimensione: dall'hotellerie al commerciale, dal residenziale privato agli edifici pubblici. A questi si affiancano alcune creazioni della nautica di lusso e della moda. Questo universo sfaccettato e caleidoscopico raffigura aspetti diversi eppure complementari del contract interpretato da Listone Giordano. La realizzazione di pavimentazioni in legno "su misura" così come le forniture su larga-scala esprimono il valore aggiunto e la forza della divisione contract Listone Giordano. Collezioni che si caratterizzano per dimensioni, spessori, finiture e trattamenti di superficie, essenze lignee e tecniche costruttive, riuscendo così a dare risposte precise e qualitative ai più diversi segmenti di mercato. Personale specializzato garantisce un servizio di consulenza evoluto e un'interfaccia qualificata tra l'azienda e il mondo della progettazione.

Listone Giordano Contract Division successfully operates in several sectors of the large-scale contract market. Hospitality, retail, residential, residential private and public buildings stand side by side with luxury projects in the fashion and yacht business. All the different aspects are still however a very important and complementary elements of the wider contract world interpreted by Listone Giordano. The creation of custom-made wood flooring projects as well as large-scale supplies are one of strengths and added value of the Listone Giordano Contract Division. Collections are characterized by dimension, width, finishing and surface treatments, wood essences and construction techniques, being able to respond qualitatively to different segments of the market. Project supervisors and area managers on site provide skilful evaluation and perfect connection between the Company and constructors, architect and specifiers as to fully meet expectations.

PROGETTI SPECIALI SPECIAL PROJECTS

atelier

Queste sono le creazioni che esprimono al meglio l'anima di un luogo, prodotti che non sarebbero potuti nascere al di fuori di un contesto molto speciale. Un luogo ove la maestria tipica degli artigiani incontra la tecnologia d'avanguardia di una azienda che ha rivoluzionato ed ora reinterpreta, in chiave contemporanea, il concetto di parquet. Prodotti unici, ispirati da una visione senza tempo e plasmati da sapienti mani. Metodi tradizionali vengono impiegati per la realizzazione di prodotti d'eccellenza, dando luce a nuove interpretazioni. Un'essenza classica, la rovere, ispira una collezione destinata a divenire l'epitome della pavimentazione in legno. L'utilizzo di trattamenti e prodotti naturali rendono questi pavimenti sicuri per la salute e rispettosi dell'ambiente. L'attenzione focalizzata ai tradizionali produttivi dà vita a delle creazioni ineguagliabili. Collezioni versatili che si prestano ad utilizzi innovativi, ideali per completare e arricchire le scelte d'interior.

NATURAL GENIUS

There are creations that more than anything else express the soul of a place, products which could not have been conceived outside a very special context. A place where the traditional art of woodcraft meets the cutting-edge technology empowered by the Company who revolutionised and now reinterprets in a contemporary key the concept of hardwood flooring. Unique products moulded by skilful hands and inspired by timeless visions. The traditional craft skills are put to use to manufacture state-of-the-art products, resulting in a totally new way of interpreting hardwood flooring. A true classic timber such as Oak inspires a collection destined to become the epitome of classy hardwood flooring. The use of natural products and treatments makes this hardwood floor safe for the health and environmentally friendly. The focus and attention on traditional production processes generate unrivalled custom-made hardwood floor solutions. Truly versatile collections opened to the imagination ideal to complement and highlight any style of interior.

WALLS

Il calore ancestrale che caratterizza il legno si lega indissolubilmente alla storia dell'umanità. Questo concetto di semplice materialità viene reinterpretato da Listone Giordano grazie a un gusto contemporaneo affine all' "Italian style". Questo è il risultato di un processo che lega superfici orizzontali con elementi verticali, creando spazi abitativi originali dove nuove sensazioni di benessere si fondono alle consuete. Questi i valori che hanno ispirato Massimo Iosa Ghini per le Boiserie Listone Giordano: un modo di vivere la materializzazione verticale del legno.

The warmth and ancestral feelings which identify with wood have intertwined with the history of men ever since. This concept and simple matter is given a new dimension by Listone Giordano in a new contemporary "Italian style." This is the result of a process which combines horizontal surfaces with vertical elements to create original living spaces where both new and traditional sensations of well being can be experienced. The are the values which have inspired Listone Giordano and Massimo Iosa Ghini in designing Boiserie: a way of living materializing in a vertical contact with wood.

Listone Giordano ha intrapreso negli ultimi anni diversi progetti di R&S in collaborazione con designer ed architetti italiani ed internazionali, che hanno portato alla creazione di pavimenti inediti e perfettamente rispondenti ai bisogni di unicità, personalizzazione e visione dei progettisti. Il parquet viene così “letto” in chiave contemporanea contribuendo ad apportare soluzioni su misura ed introducendo commistioni inedite di diversi materiali, finiture, geometrie ed effetti cromatici. Suggestioni, riflessioni e spunti creativi per plasmare una “materia” viva e portatrice di valori e di una storia che da sempre ha guardato da vicino quella dell’uomo. Collezioni innovative, interpretazioni contemporanee per soluzioni di interior design che fondono sapientemente la tradizione e la cultura del legno con tecnologie all’avanguardia, permettendo la creazione di ambienti futuristici che rispecchiano la creatività del mondo della progettazione.

The know-how of Listone Giordano R&D in collaboration with architects and designers has created an innovative flooring system that responds to the needs from the design world for uniqueness and personalization. These most experimental collections offer a new way of thinking and experiencing innovative horizontal interior solutions with strong visual and chromatic impact, combining the tradition and culture of wood with revolutionary technologies.

The creation of customized and futuristic environments according to the creativity and visionary concepts of international architects and design studios expands to create surprising and elegant customized solutions.

Listone Giordano Contract cutting-edge collection is the dedicated framework by which the extensive experience of the wood industry and specific technical knowledge can be successfully combined.
