## Coral OAK white

brushed | white oiled

: **Hotel** | Wellness Hotel GMACHL \*\*\*\*Superior with 500 m<sup>2</sup> mafi Coral Oak

It is always the family businesses which clearly attract each other. The Gmachl family is known as one of the oldest family run businesses in Austria, and as such we are all the more happy that also the mafi family was allowed to be part of the new project. The hotel itself is a Spa Hotel \*\*\*\*Superior at the gates of Salzburg. In 9 rooms of the “Residence Apartment” premium category approximately 500 m<sup>2</sup> of mafi Coral Oak white, brushed and white oiled were installed. For this concept Franz Kirchmayr, architect in, you guessed it, his own family business, drew the responsibility.

Our gaze often wanders onto the floor and here is where the great potential of the mafi Coral Collection is revealed. Even though the cracks come from the tree, they are harmonised during the course of production and then milled by hand. With the Coral Oak white, the Gmachl family chose also white putty filler which stretches gently in the direction of the planks. The installation and walking direction were combined which leads one right into the hotel room. [read more on [mafi.com](https://www.mafi.com)]

Give ideas / show concepts / find solutions – our references on mafi.com

A composition of our most beautiful projects over the last 15 years is waiting for you on mafi.com. The references area provides an overview as well as allowing for a comfortable reading. A second view shows the objects on the World Map and gives information on mafi floors in your area. As a further assistance for our partners, the view can be filtered down by a total of 16 categories such as stairs, bathroom or public projects. The link to the current view can also be sent and thus used as a quick overview of e.g. completed Restaurant projects.

Our 214 references have a direct link to the respective product and as a result allow easy access to further information. The associated planners and architects are now also displayed in the course of the reference view and linked. We also rely on our partners looking for new references. We always look forward to exciting projects, new ideas or just simply the information with which concepts with our natural wood floors have been implemented. [mafi.com]

: Room climate | Humidifiers for the Winter months

An elegant solution for your optimal room climate

Winter is at the door and with it also a recurring, room climate problem. Ideally, the room air humidity is between 40 – 60 % at 21° Celsius ambient temperature. Yes, that's also the ideal climate for your wood floor and also for yourself. However, in the winter months the humidity decreases significantly. Plants, proper ventilation and even humidifiers provide a remedy here.

For one year now we have Oskar with us. 'Oskar' is a nicely formed, either black or white cube, which quietly, germ-free and comfortably does his job as a humidifier. Matching this, we carry 'Selina' the hygrometer and 'Robert' the air purifier. Do something good for yourself and your natural wood floor, and secure your designer humidifiers pack in our shop now.
