Formate:

Formats:

3-Schicht-Aufbau für die schwimmende Verlegung  
3-layer construction for floating installation

- 1

**Schiffsboden / Longstrip:**  
4000: 13,5 x 180 x 2200 mm  
17/32 x 7 3/32 x 86 5/8“  
3000: 11 x 180 x 2210 mm  
7/16 x 7 3/32 x 87“
- 2

**Landhausdiele / Plank 1-strip:**  
4000: 13,5 x 180 (173) x 2200 mm  
17/32 x 7 3/32 (6 13/16) x 86 5/8“  
3000: 11 x 180 x 2200 mm  
7/16 x 7 3/32 x 86 5/8“
- 3

**Landhausdiele Plaza / Plank 1-strip Plaza:**  
4000: 13,5 x 240 (220) x 2200 mm  
17/32 x 9 7/16 (8 21/32“) x 86 5/8“
- 4

**Toscana:**  
4000: 13,5 x 120 x 1000 mm  
17/32 x 4 23/32 x 39 3/8“

Oberflächen:

Die widerstandsfähige  
Versiegelung

- Versiegelte, natürlich matte Oberfläche
- Besonders pflegeleicht
- Besonders strapazierfähig

The hard-wearing finish

- High finish, natural matt surface
- Especially easy to keep
- Particularly hard-wearing

Die naturnahe  
Öl-Wachs Oberfläche

- Oberflächenschutz durch aufgetragene Öl-Wachs-Schicht
- Schützender Film auf der Bodenoberfläche mit mattem, naturnahem Glanz
- Geringer Pflegeaufwand

The close-to-nature  
oil/wax finish

- Surface protection through applied oil wax coating
- Protective film on the floor surface with matt, natural-looking shine
- Only a small amount of care required

Die atmungsaktive  
Naturöl-Oberfläche

- Oberflächenschutz durch oxidativ trocknendes Naturöl, das in die Holzporen eindringt, diese aber nicht verschließt. Somit bleibt das Holz atmungsaktiv und behält seine natürliche Optik und Haptik.
- Ausdrucksstarke, natürliche Oberfläche
- Regelmäßige Pflege erforderlich

Breathable natural oil  
surface

- Surface protection with oxidative, drying natural oil that seeps into the pores of the wood, but these do not close. The wood can then breathe and retains its natural look and feel.
- Expressive, natural surface
- Requires regular care

Pflege:

Zur Reinigung und Pflege empfehlen wir unsere optimal abgestimmte Öko-Pflegeserie clean & green.

Care:

For cleaning and care we recommend our optimally harmonised clean & green eco care series.

Parkettreiniger  
natural  
für alle Naturböden

Parquet Cleaner  
natural  
for all types of natural floors

Intensivreiniger  
active  
für Laminatböden und  
Parkett-Grundreinigung

Intensive Cleaner  
active  
for laminate floors and  
basic cleaning of parquet

Parkettpflege  
aqua oil  
Erst- und Nachpflege für  
geölte Oberflächen

Parquet Care  
aqua oil  
for initial treatment and subsequent  
maintenance of oiled surfaces

Toscana:

4000: 13,5 x 120 x 1000 mm

Surfaces:

La vitrification hautement résistante

- Surface vernie, naturellement mate
- Particulièrement facile d'entretien
- Particulièrement résistante

La surface huilée et cirée d'apparence naturelle

- Protection de surface par l'application d'une couche huilée et cirée
- Film protecteur sur la surface du sol avec un éclat mat, d'apparence très naturelle
- Ne nécessite que peu d'entretien

La surface en huile naturelle qui respire

- Protection de la surface par l'huile naturelle à séchage oxydatif, qui pénètre dans les pores du bois sans les boucher. Le bois continue de respirer en conservant son optique et son toucher naturels.
- Surface expressive, naturelle
- Requier un entretien régulier

Superficies:

El barnizado resistente

- Superficie con barniz mate natural
- Especialmente fácil de cuidar
- Especialmente resistente

La superficie con acabado natural al aceite / cera

- Protección para las superficies gracias a la aplicación de una capa de aceite / cera
- Película protectora en la superficie del suelo con un tono mate natural
- Mínimos cuidados

La superficie de aceite natural que transpira

- Protección de la superficie mediante un aceite natural con secado por oxidación que se introduce profundamente en los poros de la madera sin cerrarlos. De este modo, la madera sigue transpirando y conserva su óptica y textura naturales.
- Superficie natural con aspecto muy expresivo
- Requiere mantenimiento frecuente

Entretien:

Pour le nettoyage et l'entretien, nous recommandons notre série de produits d'entretien parfaitement adaptée clean & green.

Cuidado:

Para su limpieza y cuidado recomendamos nuestra nueva serie de productos ecológicos clean & green.

Nettoyant de parquet

natural

Pour tous les sols naturels

Nettoyant intensif

active

Pour les stratifiés et le nettoyage de fond de parque

Entretien du parquet

aqua oil

Premier entretien et entretien complet pour surfaces huilées

Limpiador para parquet

natural

Para todos los suelos naturales

Limpiador intensivo

# Formati: Formater:

Struttura a 3 strati per  
la posa flottante  
3-lags-konstruktion til  
svømmende montering

- 1

3-strip / 3-stavs gulv:  
4000: 13,5 x 180 x 2200 mm  
3000: 11 x 180 x 2210 mm
- 2

Plancia / Plankegulv:  
4000: 13,5 x 180 (173) x 2200 mm  
3000: 11 x 180 x 2200 mm
- 3

Plancia Plaza / Plankegulv Plaza:  
4000: 13,5 x 240 (220) x 2200 mm
- 4

Toscana:  
4000: 13,5 x 120 x 1000 mm

## Finiture:

### La verniciatura resistente

- Finitura verniciata con riflesso opaco naturale
- Estremamente facile da pulire
- Estremamente resistente

## Overflader:

### Den modstandsdygtige lakering

- Lakeret, naturlig mat overflade
- Særlig let at pleje
- Ekstra stor slidstyrke

### La finitura ad olio e cera naturale

- Protezione della superficie grazie al trattamento ad olio e cera
- Pellicola protettiva sulla superficie del pavimento con brillantezza opaca naturale
- Richiede minore manutenzione

### Den naturlige olie/voks-overflade

- Overfladebeskyttelse pga. det påførte olie-voks-lag
- Beskyttende film på gulvets overflade med mat, naturlig glans
- Kræver kun meget lidt pleje

### La finitura ad olio naturale traspirante

- Protezione della superficie grazie al trattamento con olio naturale ad essiccamento ossidativo che penetra nei pori del legno senza chiuderli. In questo modo il legno conserva le sue proprietà traspiranti e acquista un aspetto naturale anche al tatto.
- Finitura naturale di grande espressività
- Richiede una manutenzione periodica

### Naturolieoverfladen der kan ånde

- Overfladebeskyttelse pga. oxidativ tørrende naturolie, som trænger ind i træets porer, men ikke stopper dem til. Dermed bevarer træet evnen til at ånde, og det føles og ser stadig naturligt ud.
- Udtryksfuld, naturlig overflade
- Kræver regelmæssig pleje

## Manutenzione:

Per la pulizia e manutenzione vi consigliamo la nostra serie di prodotti ecologici specifici clean & green.

## Pleje:

Til rengøring og pleje anbefaler vi vores perfekt tilpassede øko-plejeserie clean & green.

Detergente per parquet  
**natural**  
per tutti i pavimenti naturali

Detergente intensivo  
**active**  
per pavimenti in laminato e la pulizia di base del parquet

Manutenzione del parquet  
**aqua oil**  
Prima e successive operazioni di manutenzione per superfici oleate

Parketrengøringsmiddel  
**natural**  
Til alle naturgulve

Intensivt rengøringsmiddel  
**active**  
Til laminatgulv og grund-rengøring af parket

Parkettpleje  
**aqua oil**  
Førstegangspleje og efterfølgende pleje af oliebehandlede overflader

## Battiscopa: Fodlister:

# Форматы:

Трехслойная конструкция  
для плавающей укладки

- 1. Трехполосная доска:  
4000: 13,5 x 180 x 2200 mm  
3000: 11 x 180 x 2210 mm
- 2. Однополосная доска:  
4000: 13,5 x 180 (173) x 2200 mm  
3000: 11 x 180 x 2200 mm
- 3. Однополосная доска Plaza:  
4000: 13,5 x 240 (220) x 2200 mm
- 4. Тоскана :  
4000: 13,5 x 120 x 1000 mm

# Поверхности:

## Надежное покрытие лаком

- Лакированная, натурально матовая поверхность
- Особая легкость в уходе
- Особая износостойкость

## Натуральное покрытие на основе масел и воска

- Защита поверхностей при помощи нанесенного масляно-воскового слоя
- Защитная пленка на поверхности пола с матовым, естественным блеском
- Не требует тщательного ухода

## Дышащее натуральное масляное покрытие

- Защита поверхности благодаря окисляющему осушающему натуральному маслу, которое проникает в поры дерева, не закупоривая их. Дерево продолжает дышать, а также сохраняет естественный внешний вид и тактильные ощущения.
- Выразительная, естественная поверхность
- Необходим постоянный уход

# Уход:

Для чистки и ухода мы рекомендуем оптимально подходящую экологичную серию clean & green.

Средство для очистки паркета  
**natural**  
Для всех видов деревянных полов

Средство для интенсивной очистки  
**active**  
Для интенсивной очистки ламинированных и паркетных полов

Уход за паркетным полом  
**aqua oil**  
Первичный и последующий уход за поверхностями с масляным покрытием

# Neue Farbpalette – für noch mehr Individualität

D

■ Unsere handwerklich verarbeiteten Premiumböden der parkettmanufaktur bieten eine Vielzahl an Individualisierungsmöglichkeiten. Jetzt gibt es weitere Alternativen, den Boden auf das Wohnumfeld abzustimmen.

Zusätzlich zu den durchgefärbten Böden bringen wir ein Sortiment mit pigmentiertem Naturöl. Die ungewöhnlich sanften Farben orientieren sich an den Farbtönen der Natur und spiegeln den derzeitigen Farbtrend wieder.

GB  
New range of colours – for even greater individuality

■ Our handcrafted premium parkettmanufaktur floors offer a wealth of personalisation options and now also provide additional alternatives for coordinating floors and interiors. We offer a range with pigmented natural oil in addition to the solid-coloured floors. The unusually soothing colours are based on the colour shades from nature and reflect contemporary colour trends.

- 1 Oak Silver Grey Selectiv
- 2 Oak Blue Grey Selectiv
- 3 Smoked Oak White Selectiv
- 4 Oak White Selectiv
- 5 Oak Beige Grey Selectiv
- 6 Oak Brown Grey Selectiv
- 7 Oak Lime White Selectiv
- 8 Oak Natural Grey Selectiv
- 9 Oak Natural White Selectiv
- 10 Oak Basalt Grey Selectiv

F  
Nouvelle palette de couleurs : une personnalisation encore plus poussée

■ Fabriqués de manière artisanale, les sols haut de gamme de notre parkettmanufaktur vous offrent des possibilités de personnalisation infinies. Nous vous proposons à présent de nouvelles manières d’assortir votre sol à votre habitat. Outre nos sols colorés, nous mettons à votre disposition une gamme enrichie avec de l’huile naturelle pigmentée. Ces couleurs incroyablement douces reflètent les tons de la nature tout en s’inscrivant dans la tendance actuelle.

- 1 Chêne argent gris Selectiv

E  
Nueva gama de colores – para una personalización aún mayor

■ Nuestros selectos suelos de parkettmanufaktur, elaborados artesanalmente, ofrecen una gran variedad de posibilidades de personalización. Ahora dispone de más alternativas para armonizar suelo y vivienda. Además de los suelos tintados, ofrecemos una gama con aceite natural pigmentado. Los colores inusualmente suaves se basan en los colores de la naturaleza y reflejan las tendencias cromáticas actuales.

- 1 Roble gris plateado Selectiv
- 2 Roble gris azulado Selectiv

- 7 Roble blanco de cal Selectiv
- 8 Roble gris natural Selectiv
- 9 Roble blanco natural Selectiv
- 10 Roble gris basalto Selectiv

I  
Nuova gamma di colori - per una personalizzazione ancora maggiore

■ Lavorati artigianalmente, i nostri pavimenti premium della parkettmanufaktur offrono numerose possibilità di personalizzazione. Adesso esistono ulteriori alternative per adattare il pavimento al contesto abitativo. Oltre ai pavimenti colorati a tutto spessore, proponiamo una gamma trattata con olio naturale pigmentato. Le tonalità insolitamente tenui si richiamano ai colori della natura e si accordano perfettamente con la richiesta attuale del mercato.

- 1 Rovere grigio argento Selectiv
- 2 Rovere grigio azzurro Selectiv

- 8 Rovere grigio natura Selectiv
- 9 Rovere bianco natura Selectiv
- 10 Rovere grigio basalto Selectiv

RUS  
Новая цветовая палитра для создания еще большей индивидуальности

■ Наши полы премиум-класса parkettmanufaktur, обработанные вручную, представлены в широком ассортименте для создания индивидуальных решений. В настоящее время существуют дополнительные альтернативы для того, чтобы подобрать пол к обстановке жилого помещения. Помимо покрашенных полов, мы предлагаем также ассортимент с пигментирующим натуральным маслом. Необыкновенно мягкие оттенки напоминают природные цвета и отражают современную тенденцию в цветовой гамме.

DK  
Ny farvepalet – for endnu mere individualitet

■ Vores håndværksmæssigt forarbejdede premiumgulve fra parkettmanufaktur tilbyder mange individualiseringsmuligheder. Nu findes der yderligere alternativer til at tilpasse gulvet til boligmiljøet. Ud over de gennemfarvede gulve kommer vi med et sortiment med pigmenteret naturolie. De usædvanligt blide farver orienterer sig efter naturens farvenuancer og afspejler den aktuelle farvetrend.

Ⓛ Sortierungen

Holz ist aufgrund seines Wuchses unterschiedlich strukturiert. Es enthält nebeneinander gleichmäßig gemaserte, astfreie Anteile und lebhaft gezeichnete Partien mit Ästen. HARO sortiert das Holz nach diesen verschiedenen Strukturen wie folgt:

Holzart	Sortierung	Lebhaftigkeit, Holzstruktur	Farbvariation	Äste	Splint	Kern	Verfärbungen	Markstrahlen, Spiegel	Ausbesserungen, leichte Risse	Astspots, Holzschiffchen	Mineralische Einlagerungen
Schiffsboden

Zulässiges Merkmal kann vorkommen: ● ● ● = stark, häufig   ● ● = mittel   ● = gering   ○ = nicht

Holz ist ein Naturprodukt. Abweichungen in Farbe, Struktur und Astanteil zu den hier abgebildeten Mustern sind deshalb möglich. Bei Design Schiffsboden können unterschiedliche Lamellenlängen auftreten.

Exotenhölzer:  
Exotenhölzer können mineralische Einschlüsse aufweisen, welche auch erst zu späteren Zeitpunkten durch Fleckenbildung an der Oberfläche in Erscheinung treten können. Mineralieneinschlüsse sind holzartenbedingte Eigenschaften und stellen keinen Beanstandungsgrund dar.

Thermohölzer / Arabica:  
Durch aufwändige thermische Verfahren erhalten Hölzer eine dunklere Farbgebung. Die durch den Wärmeeinsatz entstehende Sprödigkeit des Holzes kann an der Holzoberfläche Schieferbildung hervorrufen. Ein weiteres typisches Zeichen für dieses Verfahren ist der Geruch des Holzes nach „offenem Kamin“. Wie bei dunklen Holzarten üblich, neigen auch thermobehandelte Hölzer unter Lichteinfluß zum Aufhell.

Sortierung Sauvage:  
Die Sortierung Sauvage ist bei den Holzarten Buche, Eiche und Lärche durch ihr lebhaftes-natürliches Erscheinungsbild losgelöst von konventionellen Sortierkriterien. Äste und Risse sind hierbei ein gewünschtes optisches Merkmal. Durch Klimaschwankungen kann es bei Rissen zu Schieferbildung an der Oberfläche kommen.

# Grades

The structure of naturally grown wood is very diverse. You find portions that have an even grain free of knots right next to portions which are lively grained. HARO therefore „grades“ the raw material according to different characteristics to achieve the different designs, each with its own consistent visual appearance:

Wood species	Grade	Liveliness, wood structure	Colour variation	Knots	Sapwood	Heartwood	Discolouration	Medullary rays, comb grain	Raparations, slight cracks	Knot patches	Mineral deposits

Permitted characteristics may occur: ● ● ● = many, frequently    ● ● = medium    ● = a few    ○ = none

Wood is a natural product. Deviations in colour, texture and knots from the samples are therefore possible. Longstrip patterns may differ in the lamella-length.

Exotic wood species:  
Exotic wood species can feature mineral deposits, which can appear later on as staining on the surface. Mineral deposits are natural characteristics of certain species of wood and should cause no reason for complaint.

Thermo wood species/Arabica:  
Due to extensive thermal processes, the wood species become darker in colouration. The brittleness of the wood, caused by exertion of heat, can generate the formation of shale on the surface. A further typical sign of this process is the smell of the “open fireplace”. As is normal for dark wood species, thermo-treated woods tend to become lighter in colour due to exposure to light.

Sauvage Grade:  
Due to its lively-natural appearance, the Sauvage Grade in the wood species beech, oak and larch is detached from conventional grade specifications. Knots and cracks are typical optical characteristics. Given climat fluctuations, the formation of shale on the surface is possible.

F

# Choix

Le bois est un produit naturel, dont la structure est variée. Un même tronc comporte à la fois du bois de fil sans nœuds au veinage régulier ou au contraire des parties plus rustiques au veinage tourmenté avec des nœuds. HARO classe le bois (les choix) selon la structure comme suit :

Essence	Choix	Vivacité, structure du bois	Variation de couleur	Nœuds	Splint	Bois de cœur	Décolorisations	Rayons ligneux, maillure	Réparations, fissures légères	Bouchons de nœuds	Incrustations de minéraux

Particularités acceptées pouvant survenir: ●●● = fort, fréquent    ●● = moyen    ● = faible    ○ = aucun

Le bois est un produit naturel. Des différences de couleur, de structure et de la densité de nœuds peuvent être observées par rapport aux échantillons reproduits. Dans le motif à l'anglaise (3-frises), les lamelles peuvent avoir des longueurs différentes.

Essences exotiques : Les essences exotiques peuvent avoir des inclusions minérales, qui peuvent apparaitre dans le temps sous forme de taches en surface. Les inclusions minérales sont des particularités de certaines essences et ne peuvent faire l'objet d'une réclamation.

Bois thermo-traités / Arabica : Le traitement thermique complexe donne aux bois une couleur foncée. Sous l'action de la chaleur, le matériau bois peut donner des échardes. Une autre particularité du traitement est l'odeur du bois brûlé en cheminé. Tout comme les essences de bois sombres, les bois thermotraités ont tendance à éclaircir sous l'effet de la lumière.

Choix Sauvage : Le choix Sauvage pour le hêtre, le chêne et le mélèze avec son aspect rustique et naturel ne correspond pas aux critères de choix conventionnels. Les nœuds et gerces font partis de ce choix. Suite aux variations climatiques, les gerces peuvent donner des échardes en surface.

E

# Clasificaciones

La madera crecida está estructurada diferentemente. Contiene porciones de vetas uniformes una al lado de la otra y sin nudos, y partes vivamente caracterizadas con nudos. HARO clasifica la madera conforme a estas diferentes estructuras, a saber:

Tipo de madera	Clasificación	Vivacidad, estructura de la madera	Variación de color	Nudos	Alburas	Núcleo	Descoloraciones	Radios, medulares	Reparaciones, fisuras ligeras	Tapones de nudos	Depósitos minerales

Atributo permitido puede ocurrir de manera: ●●● = fuerte/frecuente    ●● = mediana    ● = poco    ○ = ningún

La madera es un producto natural. Variaciones de color, estructura y cantidad de nudos son posibles en comparación a las muestras ilustradas. En el diseño 3-lamas pueden presentarse laminas de distintos largos dentro de una misma tabla.

Maderas exóticas:

Las maderas exóticas pueden mostrar depósitos minerales, los cuales también pueden surgir más tarde en la superficie como manchas. Los depósitos minerales son atributos particulares de la clase de madera y no son un motivo de reclamación.

Maderas termo / Arabica:

Mediante un tratamiento térmico minucioso las maderas obtienen un color más oscuro. La aspereza de la madera que surge del empleo de calor puede provocar astillas. Otra característica típica de este tratamiento es el olor de la madera a “chimenea abierta”. Como es habitual con maderas oscuras, también las maderas termo suelen aclararse bajo la luz.

Clasificación Sauvage:

La clasificación Sauvage de las maderas haya, roble y alerce está desatada de los criterios convencionales de clasificación. Los nudos y fisuras son un atributo óptico deseado. A causa de variaciones climáticas se pueden provocar astillas en la superficie.

| 221

① Classificazione

Le strutture del legno di piante dello stesso tipo cresciuto in modo naturale, possono essere talvolta anche molto differenti. Il legno può infatti avere, una vicino all'altra, parti senza nodi e con venature uniformi, ad altre con presenza di nodi e venature marcate e vivaci. I legni della linea HARO vengono quindi accuratamente selezionati e classificati con il seguente criterio.

Essenze di legno	Classificazione	Vivacità, struttura del legno	Varianti di colore	Nodi	Alburni	Massello	Decolorazioni	Raggi del legno, specchiature	Riparazioni, fisuri leggeri	Rattopi per nodi	Particelle minerali

Tale caratteristica può essere presente: ●●● = frequentemente presente   ●● = presente   ● = può essere presente   ○ = non presente

Il legno è un prodotto naturale. Per questo motivo sono possibili differenze di colore, struttura e numero di nodi rispetto ai campioni qui raffigurati. Con il design 3-strip, le singole lamelle possono avere lunghezze differenti.

Legni esotici:  
Le essenze legnose esotiche possono contenere particelle minerali che in alcuni casi diventano visibili solo dopo diverso tempo, creando delle macchie sulla superficie.La presenza di particelle mine-rali è da ritenere caratteristica normale di queste essenze e non giustifica contestazioni.

Legni „Thermo“ / Arabica:  
Tramite un lunga ed intensa lavorazione termica viene confe-rita al legno una colora-zione scura. Il calore fa sì che il legno diventi più secco e ruvido e non è da escludere la presenza di scheggie sulla superficie. Un'altra caratteristica tipica per questi legni è un odore che ricorda quello di un camino. La tipica tendenza dei legni scuri a schiarire se esposti alla luce vale anche per i legni “Thermo”.

Qualità „Sauvage“:  
Il grado di selezione „sauvage“ è diponibile nelle essenze faggio, rovere, e larice ed è caratterizzata da una vivacità naturale che non corrisponde a nessuna delle categorie di selezione convenzionali. La presenza di nodi o spaccature è una caratteristica voluta. Variaz-i-oni climatiche possono causare la presenza di schegge soprattutto laddove le doghe hanno delle spaccature.

Выращенная древесина имеет разную структуру. Она содержит, наряду с остальным, одинаковые прожилки, участки без сучков и яркие отмеченные участки с сучками. Компания HARO сортирует древесину согласно этих разных структур следующим образом:

Порода дерева	Сортировка	Живость, структура дереваг	Цветовая гамма	Сучки	Заболонь	Серцевина	Изменения окраски	Сосуды, Зеркало	Заполнения, мелкие трещины	Остатки веток, Лодочка	Минеральные отложения

Допустимый признак может встречаться: ● ● ● = Преобладающе    ● ● = Часто    ● = Иногда    ○ = Редко

Древесина является природным продуктом. Возможно отклонение цвета, структуры и частей сучков, на изображенных здесь образцах. В зависимости от дизайна, пролетные покрытия могут содержать разнообразные длинные полосы.

Экзотические виды дерева: Экзотические виды дерева могут иметь минеральные включения, которые могут также проявляться только в более поздний срок, в виде пятнистых образований на поверхности. Минеральные включения – это свойства, обусловленные древесной породой, и не являются причиной претензий.

Термодерево / Арабика: Из-за дорогостоящих тепловых процессов, древесина получает более темную расцветку. Использование тепла может вызывать образование кривизны на деревянной поверхности, в следствии хрупкости древесины. Дальнейший типичный признак этого процесса – это запах древесины как „при открытом камине“. Как обычно случается с темными породами древесины, также термо-обработанная древесина подвергается влиянию света, что приводит к осветлению.

Сортировка Саваж: Сортировка Саваж – это сортировка древесных пород бука, дуба и лиственницы с их ярко-естественным внешним видом, которая отличается от обычных критериев сортировки. При этом сучки и трещины являются желаемой внешней отличительной чертой. Климатические колебания могут привести к трещинам и, даже, образованиям кривизны на поверхности.

# Sorteringer

Træ er pga. sin naturlige vækst forskelligt struktureret. Træ indeholder udover pæne knastfri stykker også livlige partier med knaster. HARO sorterer træet efter de forskellige strukturer som følger:

Træsort	Sortering	Livlighed, Træstruktur	Farveforskelle

Tilladte kendetegn kan forekomme: ● ● ● = stærkt ofte   ● ● = mellem   ● = mindre   ○ = ikke

Træ er et naturprodukt. Afvigelser i farve, struktur og knaster til de viste billeder kan forekomme. Ved 3-stav kan der forekomme forskellige længder af lamellerne.

Ekstotiske træsorter:  
I ekstotiske træsorter kan der, afhængigt af træsorten, dannes pletter (mineralske indlejringer). Dette kan også ske lang tid efter lægningen. Mineralske indlejringer er træsort betingede egenskaber og kan ikke reklameres.

Thermo-træsorter/ Arabica:  
Igennem en speciel thermisk behandling får træet en mørkere farve. Pga. brugen af varme i denne behandling kan træet blive lidt blødere og der kan dannes splinter i overfalden. Et typisk tegn på denne behandling er også træets duft af kamin. Gulvet vil som alle andre mørkere træsorter blive lysere med tiden.

Sortering Sauvage:  
Sorteringen Sauvage er i træsorterne bøg, eg og lærk kendetegnet ved sin livlige naturlighed som ikke er bundet af konventionelle sorteringskriterier. Knaster og kerneridser er kendetegnede for denne sortering og ønsket optisk. Gennem træets bevægelse pga. forskellige luftfugtigheder kan det komme til revner og splinter i overfladen.
