ABOUT US

Artistry. DuChateau® Floors reflect passion, art in design, and an appreciation for nature. Designed to reflect the styles found in Europe from centuries ago, DuChateau® Floors are antique-styled hard-wax oil floors developed in Holland. With natural changing grain patterns and hand-crafted textures, our hardwood flooring recreates a time-worn look that showcases the character and longevity of a true vintage hardwood floor.

Luxury. Combining old world craftsmanship with luxurious modern design, DuChateau® Floors' timeless character complements nearly every atmosphere. Whether reflecting personal style in your own home or making a grand statement in a commercial setting, DuChateau® Floors offers options to meet your desires.

Innovation. DuChateau® Floors reinterprets the concept of hardwood flooring limited only by the imagination of our master craftsman. Committed to developing hard-wax oiled hardwood flooring products benefiting from the latest advances in styling, technology and innovation, our artistic methods keep us firmly at the forefront of the design industry.

Sustainability. Our core values are to make use of environmentally friendly methods and renewable forest resources to offer products that are consistently of the highest quality. As a proponent of environmentally friendly harvesting methods, DuChateau® wood floors are certified by the Forest Stewardship Council®, and each plank is treated with all-natural, ultra-low VOC hard-wax oil.

FINISH & MAINTENANCE

MAINTENANCE PRODUCTS

DuChateau® Floors are finished with a Hard-Wax Oil that is baked into the floors during manufacturing. For this reason, they must be maintained differently than polyurethane or aluminum-oxide finished floors. DuChateau® Parquet Cleaner is to be used when cleaning all DuChateau® Floors. It's a concentrate of mild soap and plant oil without any added chemicals that can discolor or damage the natural beauty of your DuChateau® Floor. Our maintenance oil is a blend of plant oil and natural waxes that act as a moisturizer and protective barrier to the floor while maintaining a natural matte finish.

Visit DUCHATEAU.COM for full maintenance instructions.

*All DuChateau® Hard-Wax Oiled
wood products.*

DuChateau® White Maintenance Oil
Recommended Products:

*For periodic brightening of
DuChateau® White Oil Floors and
applied by a professional.*

A European Tradition

HARD-WAX OIL FLOORS

One of the first to bring hard-wax oil to the U.S. market, DuChateau® Floors offer excellent durability and renewability while allowing the wood to breathe and live with you. The unique lustrous finish maximizes the wood's natural character and beauty gaining a rich patina and refinement as it ages. As it has been tested with time, a hard-wax oil finished floor will last for generation after generation.

- Traditional floor finish used in Europe for centuries
- Hard-wax oil integrates with the wood unlike a polyurethane finish
- Hard-wax oil penetrates into wood fibers and protects from within
- Environmentally friendly, ultra-low VOC, preservative-free, natural ingredients
- Spots and scratches can be minimized and often eliminated with buffing and a small application of our maintenance oil
- Hard-wax oil is extremely water repellent and is stain-resistant against water, wine, soda, and coffee
- Minimal maintenance – even in high-traffic commercial environments including airports, hotels and restaurants

CHATEAU COLLECTION®

natural elements, grain patterns

The Chateau Collection creates the same time worn look that showcases the character and longevity of a hardwood floor with natural changing grain patterns exemplifying true vintage artistic design. The ordinary free forming elements of natural wood are what give The Chateau Collection® floors its unique character and exceptional beauty.

TERRA COLLECTION™

dark colors, unique treatments

The Terra Collection matches both contemporary and traditional interior designs with its modern dark colors. The unique colors and treatments reflect the unspoiled landscape of the world's vast wilderness. From the lush, fertile volcanic flows, to the barren desert sand dunes, The Terra Collection™ is innovative, clean, and suited to fit a new generation of floors. The Terra Collection™ brings the beauty of nature to the comfort of interiors.

RIVERSTONE COLLECTION™

hand-sculpted, organic contours

The Riverstone Collection is an evolution of hand-sculpted hardwood flooring that blends beautifully with interiors old and new. Natural distressing and raised knots give the floors a raw and organic contour that feels comforting beneath the feet. While maintaining the elegance that is DuChateau®, The Riverstone Collection™ effortlessly merges modern and rustic design to create a truly original and inspiring floor.

HERITAGE TIMBER EDITION™

reclaimed patina, salvaged texture

The Heritage Timber Edition captures the patina of reclaimed building materials while preserving the integrity of historical structures. Celebrate the original character of recycled wood with artfully distressed surface scrapes, nail holes, notches, and saw kerf marks reminiscent of salvaged textures. The Heritage Timber Edition™ offers incomparable architectural quality combined with modern fabrication of FSC®-certified wood.

FINE SAWN COLLECTION™

contoured distressing, statement

The Fine Sawn Collection conveys a statement of fashion and functionality which brings inspiration to any atmosphere. The finishing technique is a fine sawn, contoured distress which accents the floor, brings out a new feel, but still maintains its perfect fit. Prized by interior designers for its unique trend in design, The Fine Sawn Collection™ offers a vintage feel, easy maintenance and an aspect of style well suited for a commercial environment.

PALAIS COLLECTION™

custom medallion parquet panels

The Palais Collection celebrates the art form developed by the original parquet masters. In medieval times, parquet floors were highly valued and garnered special attention. Skilled artisans selected hardwoods with the best grains to create eye-pleasing patterns that transcended time and tradition. Our Palais Collection is a renaissance of time-honored artistry blended with modern performance.

CONSTRUCTION

DUCHATEAU® ENGINEERED FLOOR CONSTRUCTION

DuChateau® Floors are truly an antique style floor with knots and cracks indistinguishable from a solid floor. When installed, our engineered floor offers the same look and feel of a solid wood floor, but with the added benefits of quality construction, stability at wide widths and lengths, flexible applications, and resource conservation.

- > Top hardwood layer is the same genuine hardwood as in solid hardwood floors
- > 4 mm top layer allows sanding three times over floor's lifetime - if required
- > Composed of cross-stacked layers that provide stability and resistance to expansion and contraction
- > No warping, cupping, or bowing compared to solid wood flooring at same wide widths and long lengths
- > Easy to install tongue and groove construction with minimal on-site labor required
- > Flexible applications on any grade level, over concrete subfloor, or over radiant heat
- > Suitable for interior commercial and residential flooring or ceiling and wall panel applications
- > Uses 1/4 of the hardwood resources of a solid wood floor and renewable substrate

3/8" VALUE ENGINEERED

5/8" QUALITY ENGINEERED

3/4" DUOFLOOR

*² Nominal top layer thickness measured prior to finishing processes. Finishing processes such as wire brushing or hand scraping will affect the overall thickness.

LIFETIME LIMITED STRUCTURAL INTEGRITY WARRANTY*

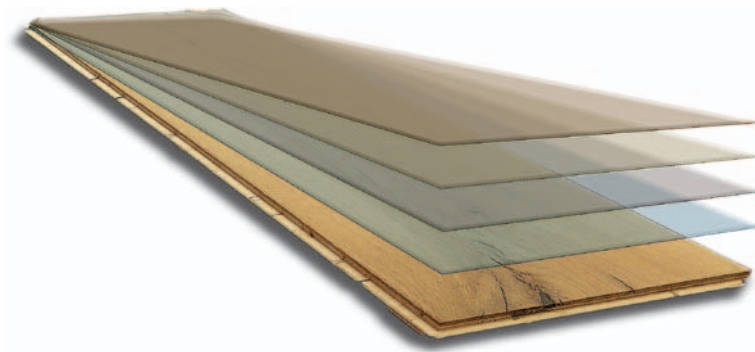

DuChateau® Quality Engineered Floors feature a multi-ply cross grain construction made from a durable hardwood substrate that is precision milled for a perfect tongue-and-groove fit. DuChateau® Floors warrants to the original purchaser its products, in their original manufactured condition, to be free from manufacturing defects in milling, dimension, and grade for the lifetime of the floor.

25 YEAR RESIDENTIAL SURFACE FINISH LIMITED WARRANTY*

Quality Engineered Hard-Wax Oil finished floors are warranted by DuChateau® Floors for 25 years from the date of purchase for residential applications. Through proper maintenance, our clear finish won't alter the color of the floor, and the floor won't peel or separate from the top layer. Flooring must be used under normal residential traffic conditions, and proper care and maintenance per instructions provided by DuChateau® Floors must be followed for warranty to be valid. The use of products not approved for DuChateau® Floors may damage your floor and void the warranty.

3 YEAR COMMERCIAL SURFACE FINISH LIMITED WARRANTY*

Quality Engineered Hard-Wax Oil finished floors are warranted by DuChateau® Floors for 3 years from the date of purchase for commercial applications. Through proper maintenance, our clear finish won't alter the color of the floor, and the floor won't peel or separate from the top layer. Flooring must be used under normal commercial traffic conditions and proper care and maintenance per instructions provided by DuChateau® Floors must be followed for warranty to be valid. The use of products not approved for DuChateau® Floors may damage your floor and void the warranty.

FINISHING PROCESS

- Final hard-wax oil
- Fine grain sanding
- Deep hard-wax oil (to seal pores)
- White, black, or natural oil (to accent grain)
- Hardwood surface (thermo-treated, distressed, or wire brushed)

**For full warranty and maintenance instructions, please visit our website: duchateau.com. Other terms, conditions, and exclusions apply. The above is not intended to be a full or complete summary of our warranties and should not be relied on without reviewing the complete text of our warranty.*

The mark of
responsible forestry

FSC® CERTIFIED WOOD PRODUCT

DuChateau® Floors are certified by the Forest Stewardship Council® (FSC®). FSC® is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests.

Established in 1993 as a response to concerns over global deforestation, FSC® is widely regarded as one of the most important initiatives of the last decade to promote responsible forest management worldwide.

The FSC® label provides a credible link between responsible production and consumption that enables consumers and businesses to make purchasing decisions that benefit people and the environment as well as providing ongoing business value. FSC® provides a certification system with internationally recognized standard-setting, trademark assurance, and accreditation services to companies, organizations and communities interested in responsible forestry.

CARB CERTIFIED WOOD PRODUCT

All DuChateau® Floors are CARB Certified. CARB Certification is commitment to producing environmentally sustainable materials.

The world's strictest formaldehyde emission standards for composite wood products took effect in California starting Jan. 1, 2009. This means particleboard, medium density fiberboard (MDF) and hardwood plywood manufactured for sale or use in California must comply with the new California Air Resources Board (CARB) regulations. The Federal EPA is monitoring the CARB rule and conducting its own risk analysis of the dangers of formaldehyde emission levels for implementing a national wood products emission standard in the near future.

GLOBAL RELEAF® BY AMERICAN FORESTS

DuChateau® Floors is a partner of American Forests, a non-profit organization whose goal is to plant 100 million trees by the year 2020. American Forests works to protect, restore and enhance the natural capital of trees and forests world-wide. DuChateau® Floors allocates a portion of its profits to the Global ReLeaf® campaign by American Forests to plant trees world-wide. In partnership with American Forests.

DuChateau® Floors has a promise to its clients, employees, & mother earth:

*"We promise to plant two trees for every tree
that we use to produce hardwood flooring."*

LACEY ACT COMPLIANT

The Lacey Act (16 U.S.C. §§ 3371-3378) legislation requires all importers to declare the species and country of origin of any wood product. The Lacey Act makes it unlawful to import, export, transport, sell, receive, acquire, or purchase in interstate or foreign commerce any wood that comes from illegally logged trees. The Lacey Act is intended to protect forests worldwide from deforestation and prevent illegitimate wood products from entering the United States. The Lacey Act, originally signed into law in 1900, is a conservation law that focuses on the illegal commercial transportation of wildlife and non-native species. In May 2008, a new bill (Section 8204) extended provisions to the Lacey Act to address the global illegal logging trade.

The Lacey Acts creates a fair playing field for wood manufacturers that follow the high level of standards imposed and eradicates illegally logged wood that is often the cause of wood flooring sold below market price.

In an effort to control and eliminate illegally logged trees, DuChateau® Floors supports and abides by the Lacey Act to ensure its customers the best quality wood flooring with environmentally friendly measures. All DuChateau® Floors are Lacey Act compliant.

US BUILD GREEN COUNCIL MEMBER

DuChateau® Floors is a member of the U.S. Green Building Council. The U.S. Green Building Council (USGBC) is a 501(c) (3) non-profit organization that certifies sustainable businesses, homes, hospitals, schools, and neighborhoods. The USGBC is dedicated to expanding green building practices and education, with its LEED® (Leadership in Energy and Environmental Design) Green Building Rating System™.

LEED® Green Building Rating System™ is a voluntary, consensus-based national rating system for developing high-performance, sustainable buildings. LEED® addresses all building types and emphasizes state-of-the-art strategies in five areas: sustainable site development, water savings, energy efficiency, materials and resources selection, and indoor environmental quality.

DuChateau® Floors qualifies for LEED® credits. This rating system has become the top choice for all architects, builders, and interior designers who construct using green building practices. DuChateau® Floors also has LEED® AP staff to help with any LEED® consulting.

DuChateau® Floors LEED® Qualifiers:

- > MR 7 – Certified Sustainably Harvested Wood
- > EQ 4.4 – Low Emitting Materials
- > MR 6 – Rapidly Renewable Materials
