Panels: inspired interior design for walls and ceilings

Panels are home classics that constantly reinvent themselves. Panels accentuate your very personal lifestyle as perfect interior design always includes the walls and ceilings. They are extremely versatile and can highlight individual parts of walls and ceilings or large areas. They help hide anything you don't want to show with renovations and loft conversions. For example, wonky walls. Or masonry cracks that are often harmless but not very pleasing to the eye. Mood lighting is also not a problem with panels. And to top everything off, cleaning is also not a problem with easy to clean and wipeable surfaces. Making walls and ceilings real eye-catchers with a great comfort factor.

Decorative panels

Classic Bocado

How to make rooms more expressive.

Boredom is a thing of the past, today's all about variety! A decorative panel adds an attractive quality to any room. Give it a try: Classic decorative panels from MEISTER are an excellent alternative to classic wallpaper.

As they ensure a perfect visual appearance, keep the heat in the room with appropriate insulation and contribute to design with their clear lines. And they can do even more: Classic panels can be superbly combined with the right lighting and the technology and cables can be made invisible in no time at all.

Panels Classic | Bocado 200 | Plain white gloss DF 324 | Dekor

Decorative panels Classic

Bocado: Simply perfect!

1

Simply practical

MEISTER Classic decorative panels are approved for installation in humid rooms (not in areas directly exposed to splashing water). That means you can install them in bathrooms as well as in kitchen diners. Thanks to the high quality of materials and careful workmanship, all Classic decorative panels are suitable for use with recessed lights. Make sure you use lights with the MM approval mark!

2

Simply select

All 14 decors are available in three different widths (20, 25, 30cm) and different lengths: from 1.28m to 4.10m.

3

Simply easy to fit

Obviously, many things are easier in twos than on your own. But you can install MEISTER Classic panels in the widths 25 and 30cm without any additional support thanks to the practical 1-person installation aid. This innovative principle makes the work considerably easier and can be conveniently carried out by just one person: the panel can be quickly and securely fixed into the right position thanks to a click mechanism that prevents it from sliding out of the tongue. It is still possible to move it lengthways though. From a panel length of 3.30 metres we recommend installation by two people.

Simply mounted

Classic panels in the widths 25 and 30 cm can be easily and directly fixed to the wall using the "No. 20" special screw (Classic panels in 25 cm width can also be fixed to the ceiling in this way) thanks to the extended groove. No profile clamps are required for fixing.

The ceiling edging can simply be pushed on using practical fixing clips that are screwed onto the panel. The advantage: they can simply be removed for any renovation work such as painting or wallpapering!

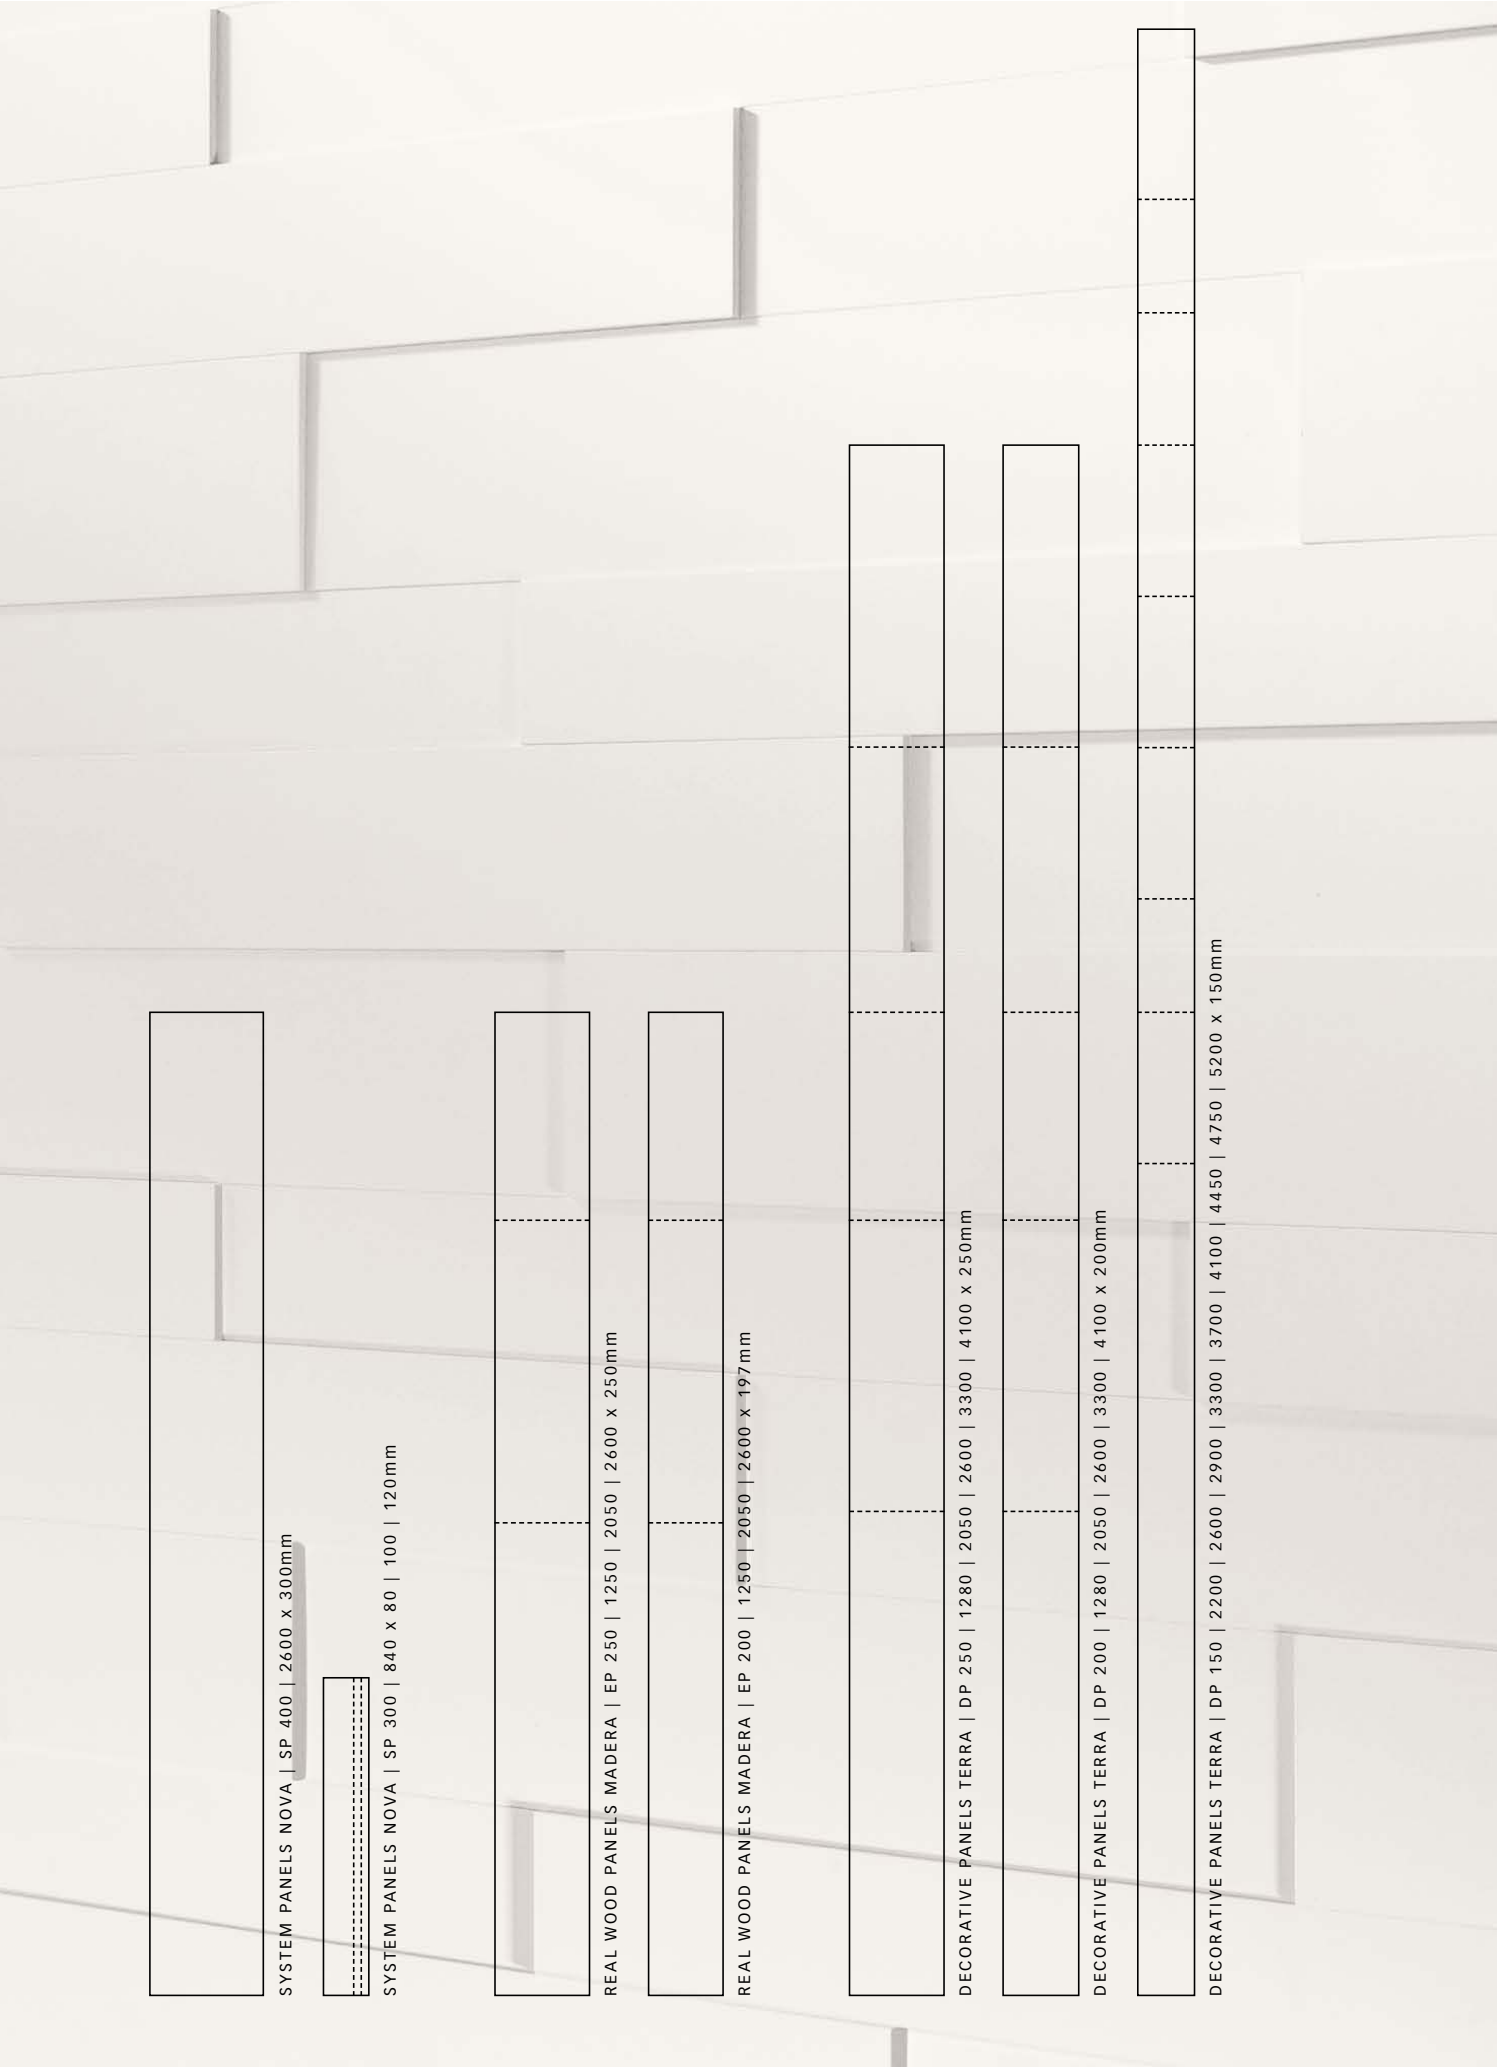

No. 20 special screw

The collection Bocado 300 and Bocado 250 can be easily and directly fixed to the wall using the "No. 20" special screw thanks to the extended groove. No profile clamps are required for fixing.

Fixing clips

The ceiling edging can simply be pushed on using practical fixing clips that are screwed onto the panel. The advantage: they can simply be removed for any renovation work such as painting or wallpapering!

Panels Premium
walls and ceilings in
their most beautiful form

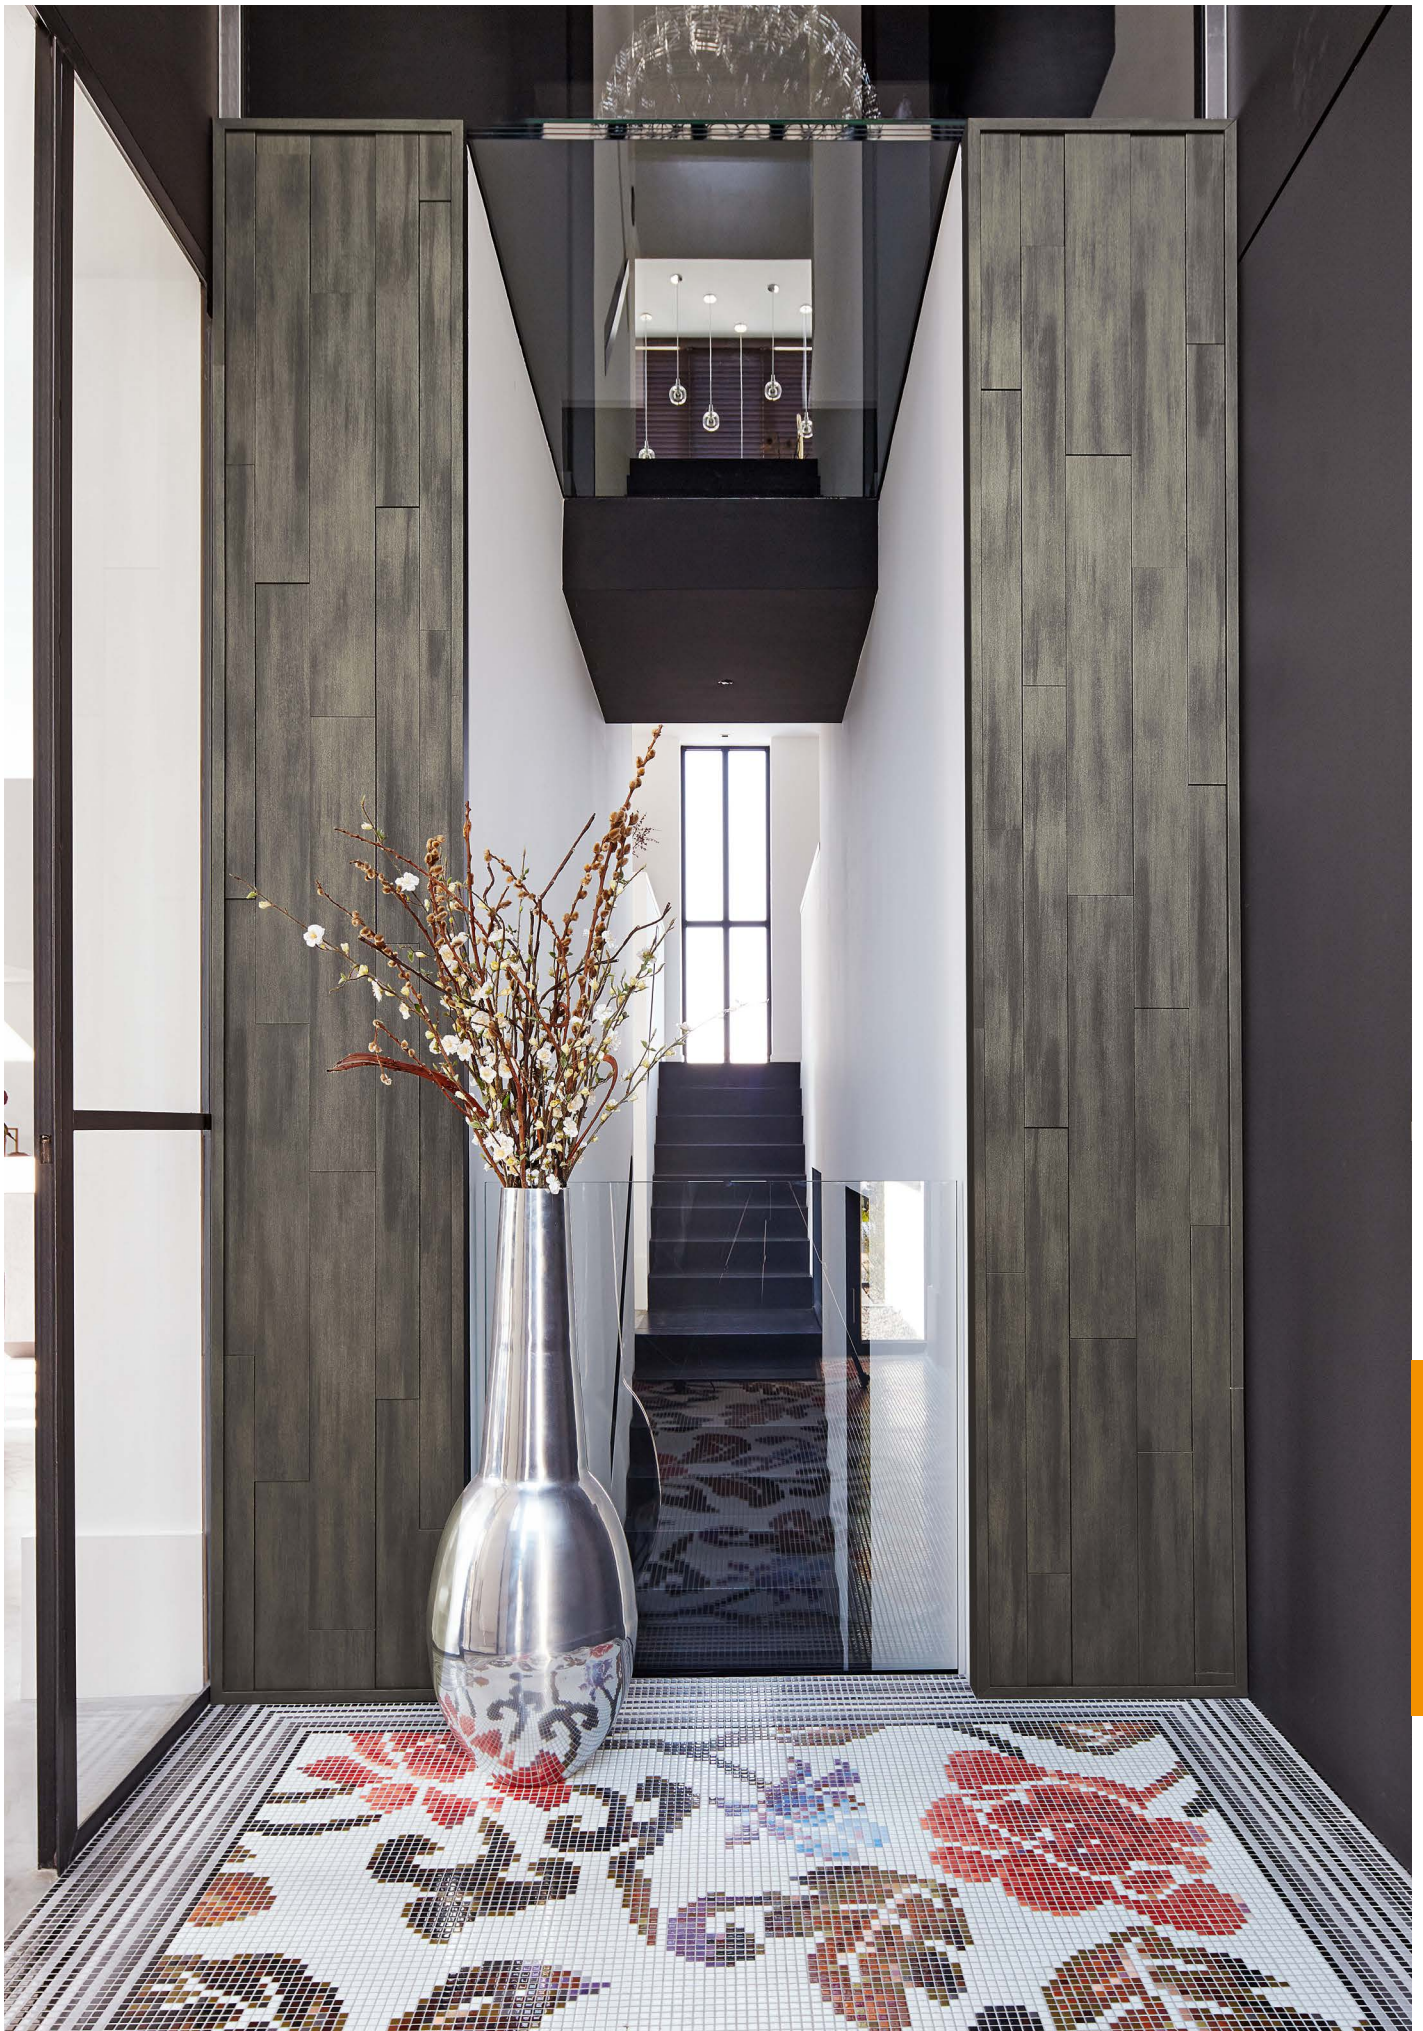

System panels Nova | SP 300
Gold metallic 4081 | Imitation

Welcome to the third dimension

There's no question: Inspired living does not stop with the floor design and selection of furniture. It also takes walls and ceilings into account. There are so many possibilities for giving rooms their very own personal touch. For example, our high-quality Premium panels.

Decorative panels Terra | DP 200 | Fineline cappuccino 4018 | Decor

System panels Nova | SP 300 | Steel metallic 4078 | Imitation

System panels Nova: Walls with that special something.

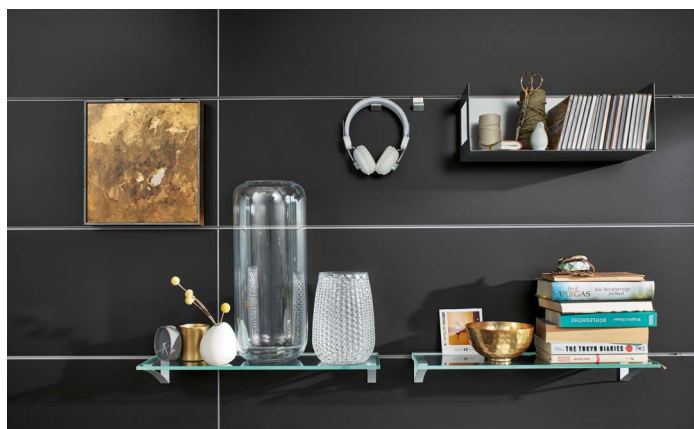

Always with a well thought-out system.

MEISTER system panels bring style to your everyday life. The "Nova" collection's elegant surfaces and effective structures make walls an exceptional part of your home. And what an effect! Cool metallic, harmonious wood decor or modern design concrete look: the selection is great and leaves (almost) nothing to be desired. By the way, the Nova panels can also be used in bathrooms as they are suitable for humid rooms.

System panels Nova | SP 400 | Board black 4037 | Decor

And the best thing is: all "SP 400" Nova versions can be cleverly expanded by comprehensive accessories, e.g. clothes hooks or kitchen utensils, shelves and flexible lights.

Real wood panels

Madera: for seamless walls and ceilings

When walls and ceilings merge together to make a home things get very cosy. Panelled sloping ceilings create islands of visual peace and give the room structure. The »Madera« panel collection with its previous real wood veneers add a very special touch of extra elegance and comfort. »Madera« also supports modern, relaxed interior design as partial cladding on the wall. And it's really practical into the bargain: a special UV acrylic varnish seal ensures it is easy to maintain. The real wood panels are also heat-resistant for all recessed lights carrying the MM approval mark.

Real wood panels Madera | EP 250 | White ash 073 | Veneer

Decorative panels Terra: terrifically transformable

Decor panels suit any room and enhance its appearance. For example, the multi-media wall is turned into a stylish private cinema, the boring corridor becomes the first eye-catcher when you enter the house. Even the bathroom benefits, as all the "Terra" collection decorative panels are suitable for humid rooms. Thanks to the high-quality "Terragen" base board combined with the water-resistant and steam-proof "Terracell" surface. The Terra decorative panels have another great bonus: thanks to its special construction, it prevents mould from forming and is therefore perfectly equipped for use in bathrooms!

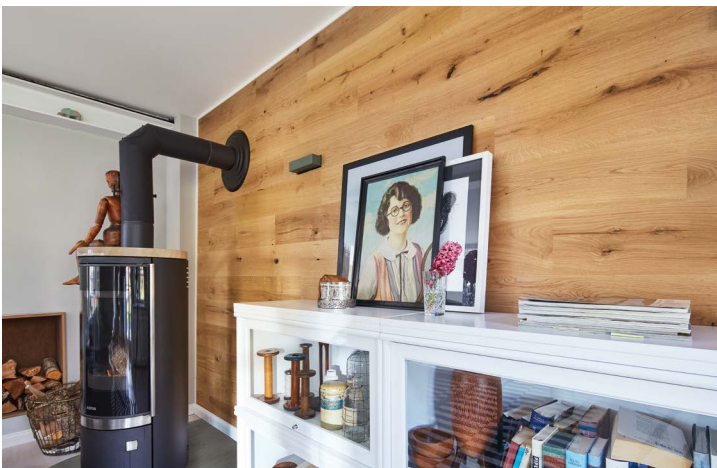

Decorative panels Terra | DP 200 | High-gloss pine 4092 | Wood effect

When the floor goes up the walls

One thing is clear: an elegant wood surface lasts longer than any wallpaper and is a quantum leap in exclusive living. Whether it's full-surface wall cladding or a specially accentuated area, as a continuation to the flooring or a separate design statement: wood on walls influences a room's atmosphere, sound and the lighting effect in a unique way.

Creative wall design with wood flooring

Is it still the floor? Or already the wall? Borders merge into one when MEISTER takes the flooring up the wall. How does it work? Amazingly simply! A simple system of metal rails and fixing clips ensures that the floor also cuts a fine figure on the wall. Real life in the third dimension.

You can make your walls more beautiful with all the Longlife parquet collections of 13 mm thickness. Lindura wood flooring can also be fixed to the wall really easily.

Lindura wood flooring | HD 300 | Natural arctic white oak 8516 | brushed | mattlacquered

And there was light!

Subtle design, impressive effect and the perfect addition to all MEISTER panels: combine your wall or ceiling cladding with high-quality LED or halogen lights from our range!

Perfect accessories for the perfect finish!

Installing panels from MEISTER is a simple matter. To make sure that your corners, ends and transitions are all perfect, MEISTER offers the perfect accessory programme – from cover mouldings to corner mouldings.

Further information on the MEISTER accessories:

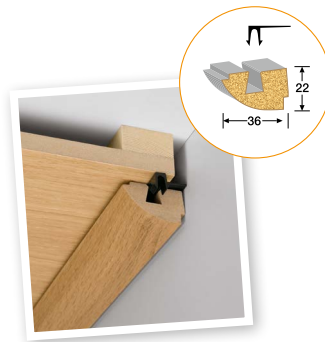

www.meister.com

1

Ceiling edging

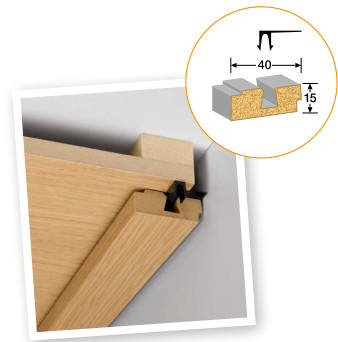

Ceiling edging guarantees clean edging for walls and ceilings.

2

Rounded ceiling edging

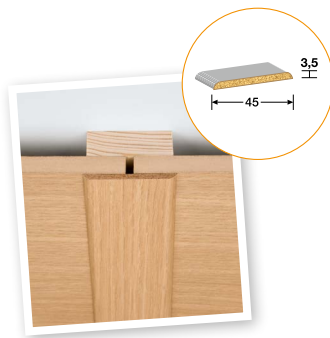

Rounded ceiling edging is modern design ceiling edging.

3

Square shaped ceiling edging

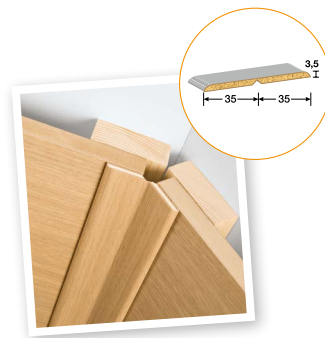

As a result of its linear shape, the square shaped ceiling edging is very modern.

4

Border moulding

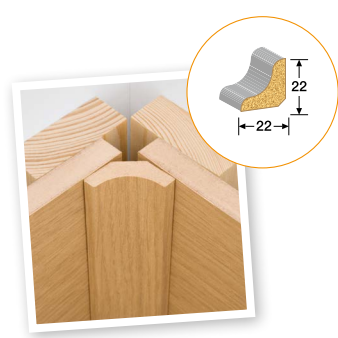

The border moulding's shape and dimensions are like that of a small hinged moulding strip. It covers butt joints that run between different materials (panels, borders, etc.) on the same level.

5

Hinged moulding strip

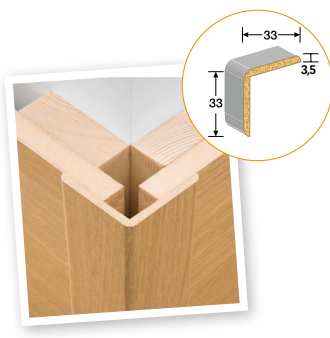

The hinged moulding strips are ideal for all corner solutions between 10° and 270°, e.g. sloping roofs or inner corners.

6

Scotia moulding

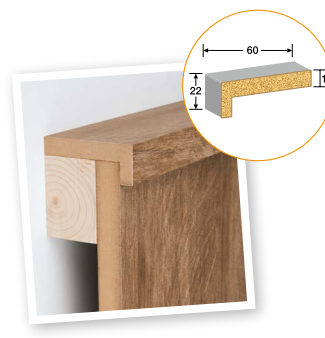

Scotia moulding can be used in a variety of ways, e.g. as a corner connection with panelling and as a skirting board.

7

Corner moulding

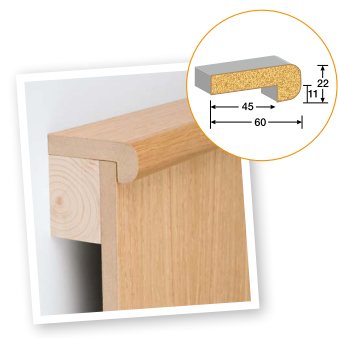

Corner mouldings are the ideal corner connections for 90° outer corners. They can be attached in combination with wood panelling or inserted in the groove.

8

Angled cover moulding

The cover moulding is the perfect finish for many areas in interior design, e.g. stairwells, halfheight panelling, door cladding, roof windows and the sides of ceiling panelling, which are not laid wall-to-wall.
