living performance

Good reasons for Parador

Philosophy

We live for products that make every home the most beautiful home in the world. Our value compass points the way: Innovative, sustainable and ecological, we are committed to the highest quality standards in all aspects of our company. In the process we always keep our feet on the ground – the basis of our success.

Inspiration & Design

The contemporary design of our floors is influenced by the latest trends from art, design, architecture and lifestyle. This inspiration is taken up by our design team, which transforms them into innovative and special looks that turn our products into trendsetters of living space design with an outstanding ecological balance.

Quality & Materiality

Parador offers aesthetic flooring concepts for every application, which are produced from high quality and recyclable materials. An authentic look, functional design and the environmentally friendly selection of materials enable the implementation of sophisticated "Made in Germany and Austria" living ideas.

Technology

In order to make laying by hand simple and effective, Parador offers intelligent click connections or high-quality adhesive systems that ensure long-term stability, depending on the product. From use in damp rooms to the integration of underfloor heating, flooring from Parador provides the perfect solution in premium quality for every context.

Healthy living

The production of environmentally friendly products is a key concern for us and is firmly anchored in our corporate philosophy. Our floors promote healthy living, are low-emission and create a pleasant living environment. We mainly use natural raw materials which are subject to constant review.

Sustainability

As a traditional wood processing company, the high regard for the environment is the foundation of our work. For this reason, we want to set standards in all aspects of ecologically responsible production – from raw materials to finished products to logistics.

PARADOR

Modular ONE – Innovative all-rounder

Looks and feels like
engineered wood flooring

Easy to maintain like laminate
flooring

Durable like vinyl flooring

This is living today: Modular ONE, the top-performing and advanced multi-layer flooring in authentic and contemporary designs. As a versatile, flexible floor covering, Modular ONE is able to withstand the challenges of everyday life – it is suitable for wet rooms, is durable, promotes healthy living and easy to maintain. In addition to exclusive decors and robust surfaces with a characteristic look and feel, it inspires as a softener-free and quiet floor from head to toe. Ecologically ground-breaking, Modular ONE “Made in Germany” meets the highest standards of sustainable living.

Modular ONE

A sense of space with system

We understand high-quality floors in a holistic way: the perfect interplay of all elements underlines the systemic principles that set Parador apart. Our accessories continue in the design and quality of Modular ONE resilient floor coverings down to the last detail. Skirting boards, end caps, underlays and the perfect care make your floor what it really is: the stage of your life.

Good reasons for Modular ONE

Flooring without compromises: Modular ONE is our innovative multi-layer flooring. As „resilient floor covering“, Modular ONE is able to withstand the challenges of everyday life – it is suitable for damp areas*, is durable, promotes healthy living and easy to maintain. With a characteristic look and feel, it is also a softener-free, quiet floor. Ecologically ground-breaking, Modular ONE „Made in Germany“ meets the highest standards of sustainable living.

High-quality decor surface, very abrasion-resistant, and easy to maintain

①

Special core board, suitable for damp areas and dimensionally stable

②

Integrated footfall sound insulation made of cork for improved room acoustics

③

Safe-Lock® PRO, fast installation and high connection stability

④

*with up to four hours of protection in the case of standing water (please observe installation instructions)

Modular ONE – pioneering living quality

Healthy living and softener-free

Through the use of harmless, predominantly natural and sustainable raw materials and without the use of softeners, Modular ONE ensures personal well-being within the four walls of your home. “Made in Germany” quality.

Authentic look and feel

The extremely authentic surfaces don't merely look like real wood, but feel like it too. The particularly matt look adds to this impression and makes the floor a real eye-catcher.

Particularly quiet and pleasant walking comfort

The elastic surface and the integrated cork back ensure optimal room acoustics, minimise noise and thus contribute to particularly warm walking comfort. Thanks to the stable core board and the cork back, slight unevenness in the substrate is smoothed out so that laying on, for example, existing tiles is also possible.

Suitable for damp rooms*

The waterproof surface and the special core board suitable for damp rooms make Modular ONE a true all-rounder, which can also be laid in damp rooms, such as the bathroom. Special edge processing also protects the floor from water ingress.

*with up to four hours of protection in the case of standing water (please observe installation instructions)

②

Chateau plank:
2200 x 235 mm

Surface design

Real beauty amazes not only the eye: the natural-looking surfaces of Modular ONE, together with the bevel image, offer an impressively coherent overall experience. While the bevel design distinguishes the characteristic profile of the floor, the texture embossing accentuates the materiality of the wood decor significantly. The extremely authentic feel is always noticeable and friendly to all who walk on it barefoot, with shoes or on four paws: healthy living, hard-wearing and easy to clean.

Bevel design

4-sided bevel

The all-round bevelled long and end edges create a pattern with the charm of a genuine wood or tile floor, in which the individual plank is emphasised.

Surface texture

Wood texture

The floor not only looks like real wood, it feels like it too: the wood texture embossing creates an astonishingly real wood impression that you can feel. The matt surface makes the decor feel even more authentic.

Modular ONE

Skirting boards and caps

Parador Modular ONE offers a wide range of optically matching skirting boards for a harmonious look for any decor. Alternatively, the colours of stainless steel, white and black or a primed moulding for individual colour design enable the possibility of conscious accentuation.

Depending on the condition of the substrate (masonry), clip or glue joints can be used for optimum wall mounting. Parador skirting boards are prepared for easy installation: with a clip system or groove for adhesive mounting. Interior and exterior corners as well as end caps and transition caps hide saw cuts and make mitre cuts unnecessary. Simply perfect!

Caps

The practical, flexible skirting board caps create clean transitions, corner solutions and finishes for the skirting boards SL3, SL5, SL6 and SL18. The caps are offered in Aluminium look or white.

Also for the Hamburg mouldings HL1, HL2 and HL3 Parador offers a new height variable cap product range in plain white.

covers existing mouldings and tiles

Profiles

Combine profiles from Parador, bridge and create finishes for a floor aesthetic that is perfect in every respect. As transition profiles, combine high floor coverings and expansion joints. Adapting profiles are used for the transition between different high floor coverings. End profiles create clean borders with tiles, sleepers and French windows.

Aluminium profiles

All four versions are offered as aluminium profiles in anodised silver or stainless steel. They ensure particularly successful transitions from room to room, while providing elegant and skilful accents.

Underlays

Parador offers the optimal solution for every application: the underlays smooth out minor unevenness and at the same time provide high compressive strength. With an integrated vapour barrier the right underlay ensures the required moisture protection in the case of mineral substrates.

Whether a high-tech solution or an all-rounder. Underlays from Parador really emphasise the quality of the floor covering.

Product features

Footfall sound / Ambient sound

Parador underlays offer footfall sound insulation in three stages – one, two or three shafts provide particularly effective footfall sound insulation.

Suitable for underfloor heating

Parador underlays are optimally compatible with underfloor heating.

Moisture resistance

Parador underlays offer moisture resistance in two stages, which are marked with one drop or two drops (high protection).

Suitable for uneven substrates

Parador underlays compensate for unevenness and are recommended during renovation.

Compressive strength / dimensional stability

Parador underlays are characterised by high dimensional stability and compressive strength in three stages – from 20,000 kg/m² above 45,000 kg/m² up to 50,000 kg/m².

The Parador programme for resilient floor coverings

A top performer with personality: the resilient floor coverings from Parador meet individual demands for comfort, durability, versatility and ecology. With the innovative Modular ONE, the versatile vinyl flooring and the low-noise Eco Balance PUR, Parador offers elastic floor coverings that emphasise the personality of their residents.

Modular ONE – the innovative all-rounder. Softener-free multi-layer technology for robust floors with natural, authentic designs.

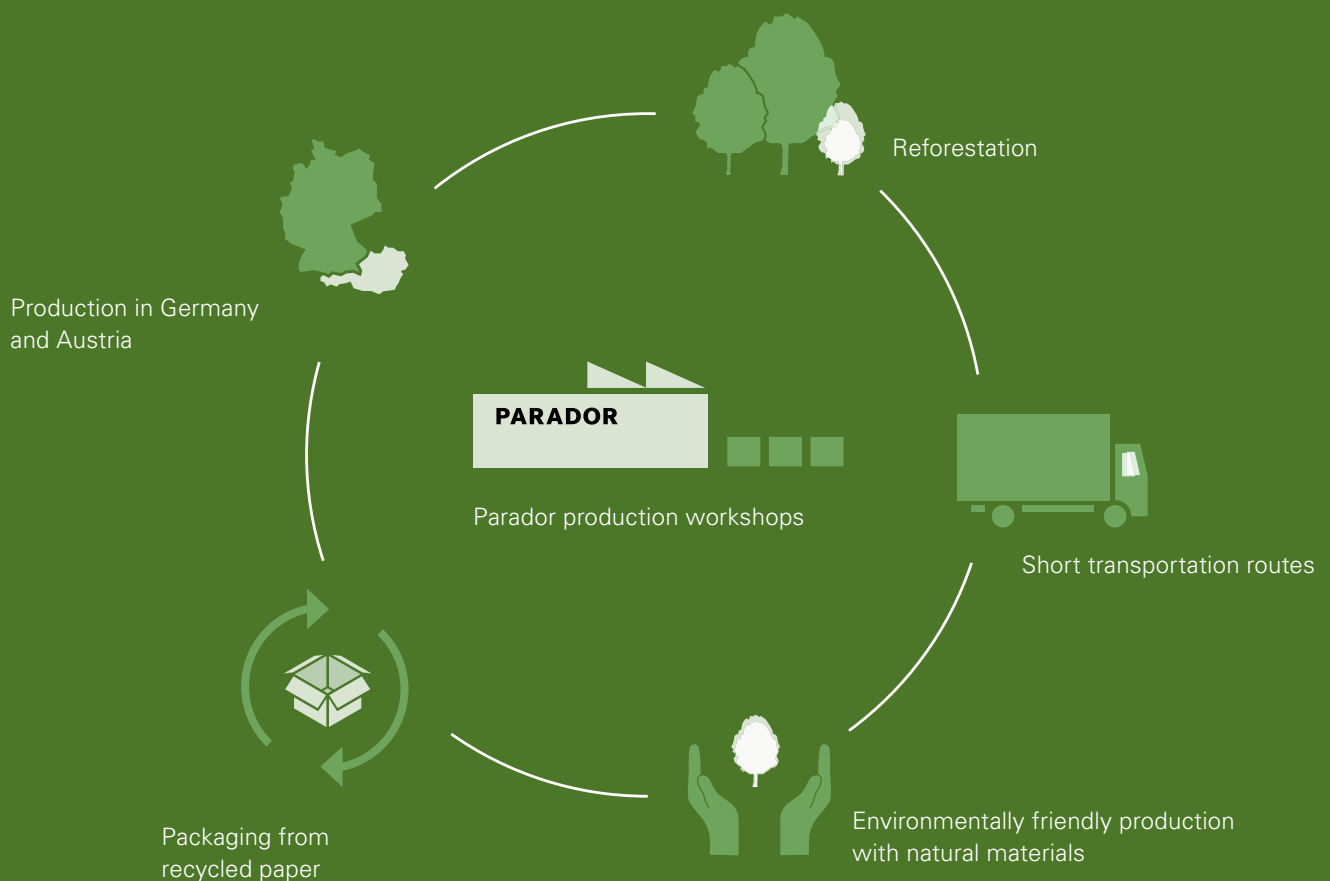

Vinyl flooring – a genuine top performer. With HDF core boards, as solid material or for gluing, the ideal floor covering for every usage scenario.

Eco Balance PUR – the low-noise alternative. Made of softener-free polyurethane for maximum comfort, healthy living and design.

Sustainable setting standards

Certified security from responsibility

As a brand manufacturer, Parador is fully and continuously certified by independent institutions. Production processes, materials, resource and environmental management, as well as product quality, meet the high corporate values of a brand with responsibility, in addition to the legal requirements. Our quality standards for Modular ONE resilient floor coverings go beyond legal requirements, something which is proved by the various certifications.

EN 14041:2004/AC:2006

EN 14041:2004/AC:2006

The CE marking is obligatory according to EU law in connection with product safety.

Émissions dans l'air intérieur (Klasse A+)

This national classification valid in France indicates the quality of indoor air.

www.blauer-engel.de/uz176

The Blue Angel

The "Blue Angel" has certified Parador Modular ONE as a low-emission product. The eco-label RAL-UZ 176.

FloorScore®

FloorScore® is one of the most recognized indoor air quality (IAQ) certification standards for hard surface flooring materials, adhesives and underlayments.

TÜV Rheinland

Parador Modular ONE has earned the TÜV certification mark thanks to its perfect product quality, product safety, understandable user documentation and the independent monitoring by the objective institute TÜV Rheinland Germany.

PEFC™

This trademark is awarded to products that meet the requirements of the certification system for the documentation and improvement of sustainable forest management with regard to economic, ecological and social standards.

Good reasons for Parador

Our stance

As a traditional wood processing company, we have a special awareness of our environment. For us at Parador, sophisticated living goes hand in hand with the responsibility to preserve nature for future generations. This includes the sustainable use of our resources. Every product made of wood is an active contribution towards climate protection. As a vital carbon store, wood products are increasingly entering people's consciousness, especially in the field of construction and renovation. Products made of wood and wood materials are sustainable and help to secure the future of the next generations.

Production

Our main raw material is wood from predominantly sustainably managed forests. We offer exclusively real wood from controlled sources of supply. The demand for transparency spans all aspects of the value chain and is documented in defined environmental standards for our suppliers. Our production is characterised by the avoidance of emissions and the return of reusable materials into the production cycle, short transport distances and the use of recyclable materials.

Commitment

Parador is the first and so far the only producer of floor coverings to be EMAS-certified. In this way, we are committed to constantly optimising our environmental management: the requirements and components of EMAS include the involvement of all the company's employees, transparent and sustainable communication with the public, continuous improvement of our own environmental performance and compliance with applicable legislation. EMAS is recognised worldwide as the most demanding system for sustainable environmental management.

Society

We have been involved with the "Plant for the Planet" foundation since 2011, whose goal is to put a stop to the climate crisis. Against this background, Plant for the Planet has set itself the task of planting a trillion new trees worldwide by 2020. Parador is supporting the initiative with tree planting and the organisation of children's academies. In the meantime, we have trained 550 children to become climate ambassadors and have planted 110,000 trees.
