**Rooms full of life.**

# Lindura – **a strong character.**

Nothing is as powerful as an idea whose time has finally come. With Lindura, MEISTER is now presenting another innovation that was developed in-house. The wood powder technology turns a normal wooden floor into a unique high-tech wooden floor. The world premiere combines real wood covering layers with wood powder and is once again testimony to the enthusiasm with which we constantly develop new floors over and over again.

The real wood covering layers with their wealth of cracks, knot holes and pores provide the perfect conditions for a secure connection to the natural wood powder material. The result is lively to rustic, brushed and naturally oiled planks with fascinating, previously unseen looks and remarkable toughness – in fact real characters.

HD 300 | Clay grey rustic oak 8411 | brushed | naturally oiled

A strong character.  
**Unique. Beautiful!**

# Real wood with depth.

Lindura stands for a distinctive rustic nature, as knots, cracks and wooden pores are emphasised particularly due to the unique production process. Naturally oiled and with a rich play on colours, each plank is a greeting from nature and is not just tough but also unique from every perspective thanks to the fine wood powder content.

**Skirting board profile 11 PK**  
Plain white gloss 324 (decorative film)

## A lively atmosphere. **Fine rustic nature.**

Light, medium brown and dark colours in naturally-oiled surface finishes create accents with this floor thanks to their extremely natural character.

**MEISTER**

HD 300 | Black washed rustic oak 8412 | brushed | naturally oiled

Two strong  
characters ...

» *Lindura opens up  
a new dimension  
in the sustainable use  
of valuable raw materials  
and in the toughness  
of wooden planks.*

*I am particularly fascinated  
by the very special look  
that results from this  
production process.  
You cannot even really describe it,  
you have to actually see it. «*

**Johannes Schulte,  
Managing Director MeisterWerke Schulte GmbH**

The fusion of innovative technology and natural raw materials produces a fascinating combination in Lindura. Wood powder is a material mix made from fine wood fibres and other natural additives which was invented by the Swedish company Välinge. MEISTER was the first company in the world to develop a manufacturing technology for series production in order to be able to offer innovative floors based on wood powder.

Johannes Schulte shapes the history of MeisterWerke unlike anyone else. His love of wood, his passion for the best possible solution and his joy in perfect craftsmanship regularly produces innovative products. Boundless enthusiasm lies behind his spirit of invention. He recognised the potential of wood powder technology very early in terms of the sustainable use of wood resources with improved toughness at the same time.

#### **Lindura – multi-layer structure:**

An idea that stands out –  
with solid arguments.  
**Lasting beauty.**

Lindura is the name for a new floor in the real wood flooring range from MEISTER that is based on wood powder technology. A real wood covering layer, wood powder, an HDF middle layer and wood powder backing are permanently fused together under pressure and heat. Resulting in floors that are tough, pleasantly warm to the foot, resistant and easy to clean. The lively to rustic real wood covering layers made from oak and larch give Lindura a particularly natural appearance.

High-tech  
**meets nature.**

... at a glance.

# Award-winning!

## Quality from MEISTER.

### MEISTER warranty

We are so convinced of the quality of our Lindura wooden floors that we give you a 20-year warranty on them. A MEISTER floor is a floor which you will love for many, many years to come because it is so easy to clean and has such a high-quality appearance and excellent durability.

Warranty according to the MeisterWerke warranty conditions at [www.meister.com](http://www.meister.com)

### The Blue Angel

The result of our responsible choice of materials and modern production processes is that all MEISTER floors carry the Blue Angel – the world's first and most well-known award for environmentally friendly products and services. This means you can be sure you are choosing a low-emissions, ecological floor.

### Lindura®

Wood powder technology produced under the license of Vålinge.

### Real Wood

Naturally authentic: With our Lindura wood flooring you are bringing the authenticity of a natural wood surface into your home.

### General building supervision permission

granted by the German Institute for Building Engineering (DIBt).

### CE mark

MEISTER Lindura wood flooring complies with all European health and safety regulations.

### MADE IN GERMANY

We are firmly rooted in our location and see it as much more than just the name of where we come from. For us, "Made in Germany" also means top quality standards.

It is our daily challenge to meet these.

# Welcome to MeisterWerke.

We have been passionately developing and making products for rooms full of life for many years. At our company headquarters in Rüthen-Meiste, in the beautiful region of Sauerland, it is our daily challenge to perfect these and therefore ensure the greatest benefit for our customers.

Our love of innovation is evident in everything: in our huge range, in our company and in the way we work together. Always collaboratively and fairly but also purposefully and reliably. Our company motto is: a MeisterWerke masterpiece every day!

As a family-run company we also think about future generations. That's why respect for nature and natural resources is a matter of course for us. We place great importance on environmentally sound origin and short transport routes when choosing our materials. Independent test institutes verify that the materials used are harmless. Resulting in products that combine top quality, maximum comfort and a great feeling year after year. For your rooms full of life.

**MEISTER**

Innovative products and system solutions are always the result of teamwork at MeisterWerke.

The careful selection of materials and decor guarantees the best result.

Our products undergo extensive quality tests on their way to becoming the perfect interior design object.

# Lindura – for all phases of life.

## Tough

Lindura loves challenges and takes high heels at a party just as much in its stride as football boots that you can even leave on after the match. What is more: through everyday use the floor acquires a sheen over time that accentuates the used look of the planks even more.

## Durable

A comparison test in our laboratory clearly shows: A metal ball dropped with 4000 newtons of pressure leaves behind a clearly visible dent on standard parquet. With Lindura wood floors there are hardly any traces to be seen.

Standard parquet

MEISTER Lindura wood flooring

# Lindura – healthy for living and easy to clean.

## Easy to clean

Regularly cleaning Lindura is the easiest thing imaginable with care products from MEISTER: simply dilute the right product from the MEISTER parquet care range for naturally oiled surfaces in water for maintenance cleaning. The floor is cleaned and polished in one work step. Follow-up treatments like refreshing floors with the Weartec Nature surface treatment are recommended to preserve their quality and with the first signs of wear. For this the floor is simply re-oiled using the appropriate care product after intensive cleaning.

## Healthy living

Lindura is a natural product, all the raw materials used are carefully selected and are subject to regular tests in our labs. The installed floor regulates humidity and ensures a healthy living climate. It is particularly hygienic thanks to it being easy to clean and maintain. As a result this high-tech wooden floor allows for environmentally-friendly and healthy living.

## Energy-saving

Thanks to the special product structure, the thermal resistance of Lindura is particularly low at  $0.084 \text{ m}^2 \text{ K/W}$  combined with the MEISTER Silence 25 DB insulating underlay. With a floating installation, the floor covering on top of a hot water underfloor heating should also not exceed the limit of  $0.15 \text{ m}^2 \text{ K/W}$  laid down by regulations\* in order to quickly transport the heat supplied to the surface.

\* Federal Association of Surface Heating and Surface Cooling.

# Renovation-friendly!

## Lindura in château plank format.

Convincing arguments speak in favour of Lindura from MEISTER:

- | the high-quality, carefully selected materials,
- | simple installation,
- | easy cleaning
- | unique look and
- | special carrying capacity.

### Lindura formats

Lindura is available in two attractive plank formats, which are also suitable for renovations with their low installation height of 11mm.

### Lindura gradings

Thanks to wood powder technology, the crack, knot and pore fillings are given a totally new, fine look that could never be achieved as authentically using standard filling techniques.

First impression:  
**lively!**

In this grading we deliberately offer surfaces with strong colours and structures, which emphasise the wood's natural character. Healthy distinctive knots and splints are part of the overall lively image. Knot holes and cracks are filled perfectly using wood powder technology.

The special touch:  
**rustic!**

This grading provides a rustic appearance with an interesting play on colours and structures. Healthy distinctive knots are not limited in their diameter or frequency. The natural and raw character of the floor is emphasised by larger knots and varying degrees of cracks, which are individually filled using wood powder technology.

# Intelligent quality through and through.

Easy, fast and safe to install – this applies to all our Lindura floors. Click systems that are configured to the floor's respective characteristics and the planks' dimensions provide the proverbial ease of installation.

For example, the patented Mastercllic Plus end connection, which was developed in our company and the tried and tested longitudinal Uniclic connection. Thanks to Mastercllic Plus even considerable plank lengths of 2 meters can be handled comfortably during installation.

**MASTERCLICPLUS**®

DE 102006037614 B3 / WO 2008/017301

Longside:

Produced under the license of Unilin™.

## Mastercllic Plus

The patented system for fast laying and secure connection. The non-adhesive Mastercllic Plus system works as follows:

1 | The flooring is lowered right next to the neighbouring plank.

2 | After lowering, the flooring is not yet locked at the ends.

3 | The tongue is only activated when the next row is laid.

4 | This results in a secure connection.

## Mastercllic Plus

# For the perfect finish – details that simply match.

Lindura floors find their perfect finish in the MEISTER accessories range. Matching real wood veneer covered mouldings are available in three profiles coordinated to the surfaces. The modern square shaped mouldings in many surfaces and the classic Hamburg skirting board can be combined with all floors and harmoniously round off the overall impression.

Skirting board profile 1 MK (42mm)

Skirting board profile 2 PK (50mm)

Skirting board profile 3 PK (60mm)

Skirting board profile 9 PK (80mm), profile 8 PK (50mm)

Skirting board profile 13 PK (120mm), 12 PK (100mm), 11 PK (80mm), 10 PK (60mm)

Skirting board profile 16 MK (80mm), 15 MK (60mm), 14 MK (38mm)

Skirting board profile 17 (70mm)

# Beautiful and also intelligent? It is possible!

It could be easy to lose track of the many excellent properties of MEISTER Lindura wooden floors but you don't have to. We have allocated a symbol to every property that makes it easier for you to find your way around.

## Durable

thanks to the fusion of wood and high-tech materials

## Easy to clean

due to cleaning and protective impregnation in one working cycle

## Spacious

thanks to impressive château plank format

## Stable

thanks to the extremely resistant HDF middle layer

## Healthy living

thanks to the use of natural materials

## Energy-saving

thanks to low thermal resistance

## Environmentally-friendly

thanks to the responsible use of raw materials

# Every day a masterpiece

We have been impressing with innovative products, practical system solutions and attractive designs for more than 80 years. We are constantly developing ourselves, our company and our range. As we know: you expect the best all the time. And that's what we want to give you.

**MEISTER is committed to its location.**

We think internationally but remain a German company – 640 employees guarantee Made in Germany premium quality day in day out.

**MEISTER is a leading innovator.**

Intelligent ideas make us the driving force behind the industry – over 200 patents and utility models are impressive evidence of this.

**MEISTER accepts responsibility for the environment.**

We act sustainably in all areas – careful product selection protects resources and the climate.

**MEISTER stands for specialist retail.**

We focus on reliable partnerships with specialist retail and specialist trade – our "100% PRO Producer/Dealer/Craftsmen" network guarantees first-class products, professional advice and expert assembly.
