

# le Valli bio

The original **handcrafted collection** “Le Valli” bio has been totally conceived in Piedmont.

A pre-finished 3-layer wooden floor, with a 4,5 mm thick solid wood layer and a fir support, suitable both for glued or floating laying.

**Brushing and oil and natural bio wax finishing** enhance the aesthetical qualities of wood.

This is a collection which gives the wooden floor its natural aspect and which satisfies the desires of those who want to live their home in a healthy way with biological raw materials.

The new technologies with oil and wax finishing maintain the wooden floor original aspect over the years and a simple maintenance with our biological care products is enough to protect it against wear and tear.

Each plank is handcrafted by expert artisans and the result is a particular and unique wooden floor.

After the different treatments (brushing, planing or saw-cut), the planks look back on old wooden floor marked by the process of time. Handcrafted “tailor cut” finishing, **the different width options and irregular edges** allow the clients to personalise their “Le Valli” bio planks in an exclusive way.

## FEATURES

### Dimensions

thickness mm:	15
width mm:	70-200
length mm:	1000-2400

### Finishing

OIL AND NATURAL WAX

Brushing  
Planing  
Saw cut
