# Products 2015/16

# The LOBA History

## ► 1922

### **Founding**

On 13 April 1922 Wilhelm Hornung and Dr Max Fischer found the "Vereinigte Wachswarenfabriken AG Hornung und Dr Fischer" in Ditzingen, near Stuttgart.

## ► 1952

### **Product expansion**

The product range expands to include the development, manufacture and sale of paints and varnishes.

## ► 1959

### **Pioneering work**

LOBA introduces the world's first commercially available thermal insulation composite system, under the brand name Dryvit®. A major contribution to energy savings.

## ► 1991

### **New dynamism**

Michael Fischer, son of company founder Dr Max Fischer, takes over leadership of the company. LOBA continues to focus on the maintenance of wood and cork flooring.

## ► 1995

### **Leadership**

With its two-component, waterborne finishing systems LOBA sets a standard that remains unmatched to this day.

## ► 1998

### **Expansion**

Founding of the first foreign subsidiary, LOBA-WAKOL POLSKA Sp.z o.o. in Poland.

## ► 2007

### **Expansion**

Founding of the subsidiary LOBA-Wakol LLC, USA.

## ► 2009

### **Innovation: preventative fire protection**

The world's first low-emission and clear fire-retardant floor finish system is introduced.

## ► 2011

### **Introduction of Advanced Technology**

Advanced Technology (A.T.) represents the latest generation of LOBA products with revolutionary technologies, innovative raw materials and/or improved application.

## ► 2012

### **LOBA's 90<sup>th</sup> anniversary**

LOBA celebrates its 90<sup>th</sup> anniversary and introduces NATURE, the first line of waterborne maintenance products for oiled and waxed floors on the market. Market launch of LOBACURE, the new generation of finishing systems with on-site UV curing – new standards in floor refinishing.

## ► 2014

### **Expansion**

Founding of the subsidiary LOBA Trading (Shanghai) Company Limited, China

## ► TODAY

LOBA continues to focus on the maintenance of wood and cork flooring. Present in more than 60 countries LOBA is a competent partner all over the world. All products are still manufactured in Ditzingen, near Stuttgart/ Germany.

## For you and the Environment

### For us, environmental responsibility means: taking action

Out of a sense of responsibility for our customers, our employees and our environment we have been committed to the development of waterborne and low-emission products for many years now. We reduce solvent content and use natural raw materials. Furthermore, the VOC content of our waterborne finishes is far below California's SCAQMD Rule 1113 which sets the limit to 275 g/L VOC.

LOBA's quality and environmental management system is in accordance with ISO 9001:2008 and 14001:2004 certified.

### Quality seals and ecolabels, as well as their test criteria

The main criteria for the award of an ecolabel are the limitation of the above-described **SOLVENT CONTENT** and the closely associated **EMISSIONS TEST**, which assesses the quality of indoor air. Often an **ASSESSMENT OF THE PRODUCT'S COMPOSITION** is also performed in order to check whether it contains substances hazardous to human health and the environment.

	Ü	EC1	GREEN LABEL	CEC	GREEN STAR	GREEN STAR
Test of solvent content	✓	✓	✓		✓	✓
Emissions test	✓	✓		✓	✓	✓
Composition assessment	✓		✓			

The Ü mark (German Mark of Conformity) is required in Germany. When it comes to health and environmental protection, you can play it safe by choosing products labelled with this mark in combination with the EMICODE®.

\* (VOC = Volatile Organic Compound)

## The LOBA Philosophy

# This is **Max!**

**We would like to introduce Max: a real professional, like you and like the surface specialists at LOBA.**

Max symbolises our close connection to the contractors and our understanding of everything you need as a wood flooring professional. **So whenever you encounter Max, you'll know: you can count on top quality from LOBA.**

**LOBA. On Top! Quality and reliability the basis for your success.**

The wood and cork floor specialist Max recommends finishing and floorcare systems from LOBA: no compromises.

**What you can expect from LOBA:**

maximum reliability and the latest technology for your everyday work. After all, for perfect results you need the specialist. You are a specialist in your field, and so are we: LOBA is the only German, medium-sized company specialising exclusively in the surface treatment of wood and cork flooring.

This makes LOBA a leading manufacturer of finishing and floorcare systems.

**Our specialist philosophy: LOBA – on Top!**

- "On Top!" stands for our specialisation in floor-finish systems: finishing, oiling/waxing, cleaning and maintenance.
- "On Top!" stands for our position as a leader in research and development. For top quality and reliability in product application.
- "On Top!" stands for added value through customer service: consultation, training and practical assistance with product application.

As a leading manufacturer and internationally recognised specialist, LOBA offers the highest level of experience. You can profit directly from this expertise. Our position as a leader in research and development is the basis for maximum quality and reliability in product application. Our collaborative approach is demonstrated by our commitment to providing reliable customer service, competent training and active support for all your questions.

**LOBA – the surface specialist for wood and cork floors**

**LOBACURE** 

# UV on-site Waterborne Finishing systems – **Floors** **done** at the **speed of light!**

## **The new generation of finishing systems.**

LOBA opens up new opportunities for you. The innovative and high-quality LOBACURE UV finish for wood floors puts an end to time consuming curing and expensive downtimes for your customers. A solid argument which underscores your efficiency. Reaches full hardness and usability instantly with UV curing.

**LOBA. On Top! Quality and reliability as the basis for your success.**

## WS Rush ADVANCED TECHNOLOGY

- Waterborne UV-finish
- Excellent scratch resistance and durability
- Exceptional chemical resistance
- Extremely low VOC (VOC <10g/L)
- Easy application

- The product flows, feels and can be applied like any other LOBA finish
- Cures instantly
- Available as full sand and finish process or as recoating process
- Ideal for applications where time is critical

### The ideal tool for UV-curing.

The curing process requires UV floor-curing equipment in compliance with technical specifications. Based on practical experience, LOBA recommends the DecoRad® Floormate. This machine is powerful and easy to use, and its clever design guarantees perfect results every time.

LOBADUR® 

# Waterborne Finishing Systems – Naturally **strong!**

## **LOBADUR® – always the right product**

The waterborne finishing systems of the LOBADUR® WS product line offers an impressively broad range of applications: They can be used for floors with moderate to high traffic, for a matt or high-gloss finish and for stained floors. LOBA primers do not leave lap marks, offering an ideal quality of application. They also minimise side bonding.

## 2K Supra

**ADVANCED TECHNOLOGY**

Based on state-of-the-art ceramic technology, this waterborne, two-component pure polyurethane finish sets new standards in wood floor finishing for very high traffic commercial areas.

- Ready for full use after 24 hours!
- Exceptionally high scratch resistance
- Extremely high elasticity
- Excellent chemical and wear resistance
- Non yellowing

LOBASOL® 

# Floor Oils and Waxes – nothing beats **Natural Beauty.**

## **Beautiful appearance, excellent properties**

The attractive appearance of oiled finishes brings out the pleasantly warm naturalness of the wood. And no other products do this better than LOBA's modern and completely solvent-free oil and wax systems made from natural raw materials. Products from the LOBASOL® range are known and loved for their environmental compatibility and outstanding properties. With their high wear resistance, moisture- and dirt-repellent properties and exceptional chemical resistance LOBASOL® products are the ideal solution for the most demanding applications.

**NEW**

## ActiveColor

Waterborne, solvent-free reactive stain for achieving natural colour effects. On raw tannic-acid containing types of wood such as oak. The colour intensity depends on the tannic-acid content in the wood. The tannic-acid free sapwood parts do not react with stain. As a result unique natural colour effects similar to smoked oak can be achieved. In combination with HS 2K ImpactOilColor many different further colour effects can be achieved.
