Wood Professional **Cosmetics**

Ca' d'Oro
Gilding Line

Since decades Borma Wachs products are in the wood-care and synthetic surface treatment industry, with sense of responsibility and constant commitment. Our focus is always on reliability, flexibility and quality, necessary requirements that define our company profile, as the safety and the marketability of our products. As specialists of professional wood and synthetic surfaces cosmetics, we offer to our customers the best quality.

IBR

Borma Wachs products are tested and approved by IBR, Institut für Baubiologie in Rosenheim. The performed analysis certify that our products are complying in terms of VOC content, biocides, heavy metals, and radioactivity, guaranteeing full eco-compatibility with Green Building principles. Borma Wachs has always tried to understand the needs and the sensibility of customers, asking for eco-sustainable treatments, deriving from renewable sources of raw materials, aiming to minimize impact on environment and on the health of people.

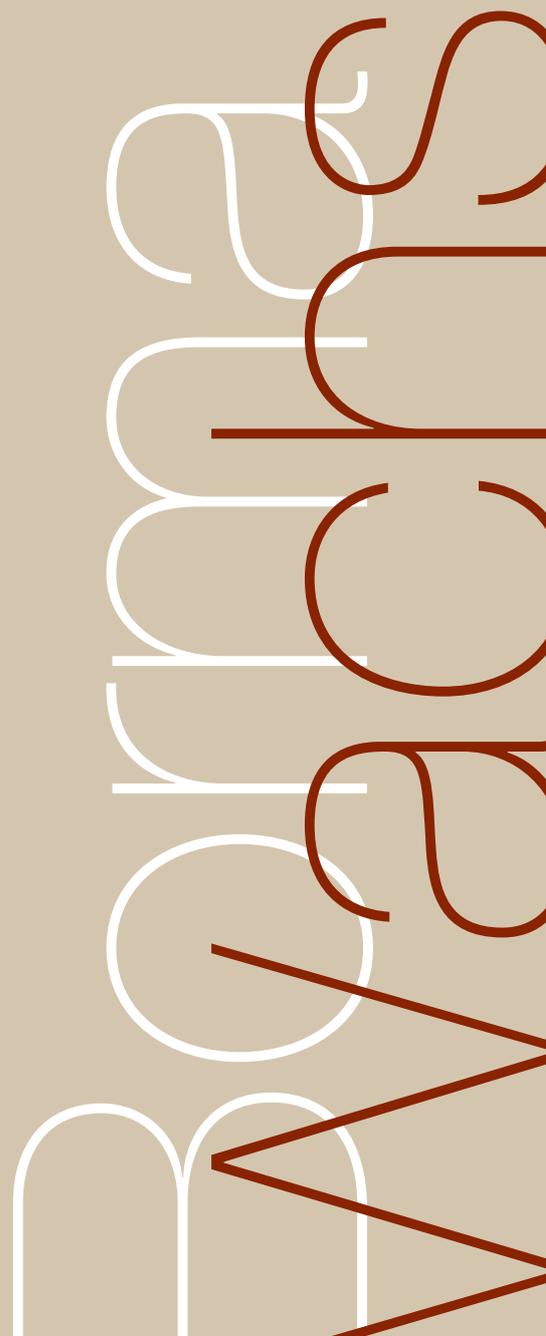

EN71-III

Eurofins danish laboratories have recognized the conformity of Borma Wachs oils to EN 71-III norm, for the migration of harmful heavy metals, guaranteeing the safety of the treatments in such a way that they can also be safe for use on children's toys.

VOC FREE

All Borma Wachs products respect European norm for solvent vapor emissions in the atmosphere, in total respect for human health and environment. With the new PREMIUM ECO – VOC FREE line we are able to offer a new range without compromises, with 100% natural products and biodegradable, with a VOC content equal to zero.

ZAPON 2k POLYURETHANE FINISH

Polyurethane finishing varnish, characterised by very good covering and superficial hardness. It is perfect for the final coat of all kind of wooden surfaces. When colored, it is particularly suitable for the finishing of single color furniture. It must be catalyzed with HA.072 at 50% rate if transparent opaque finish, with HA.041 at 50% rate if colored opaque finish and with HA.063 at 100% rate if glossy transparent finish. Otherwise is it possible to catalyse each of these varnishes with HA.041-NY, special anti-yellowing catalyst, at the same rates of the previous catalysts (percentages by weight).

Available colors: Transparent, White, Black. By request: Yellow, Red.
