

THE WAY WE MAKE YOU ROCK

UNIQUE TECHNOLOGY

SOUND-STOP TECHNOLOGY

The adhesive fixation of the innovative layer that goes directly to the subsurface corresponds to state of the art technology and makes the floor particularly quiet.

AQUA-STOP TECHNOLOGY

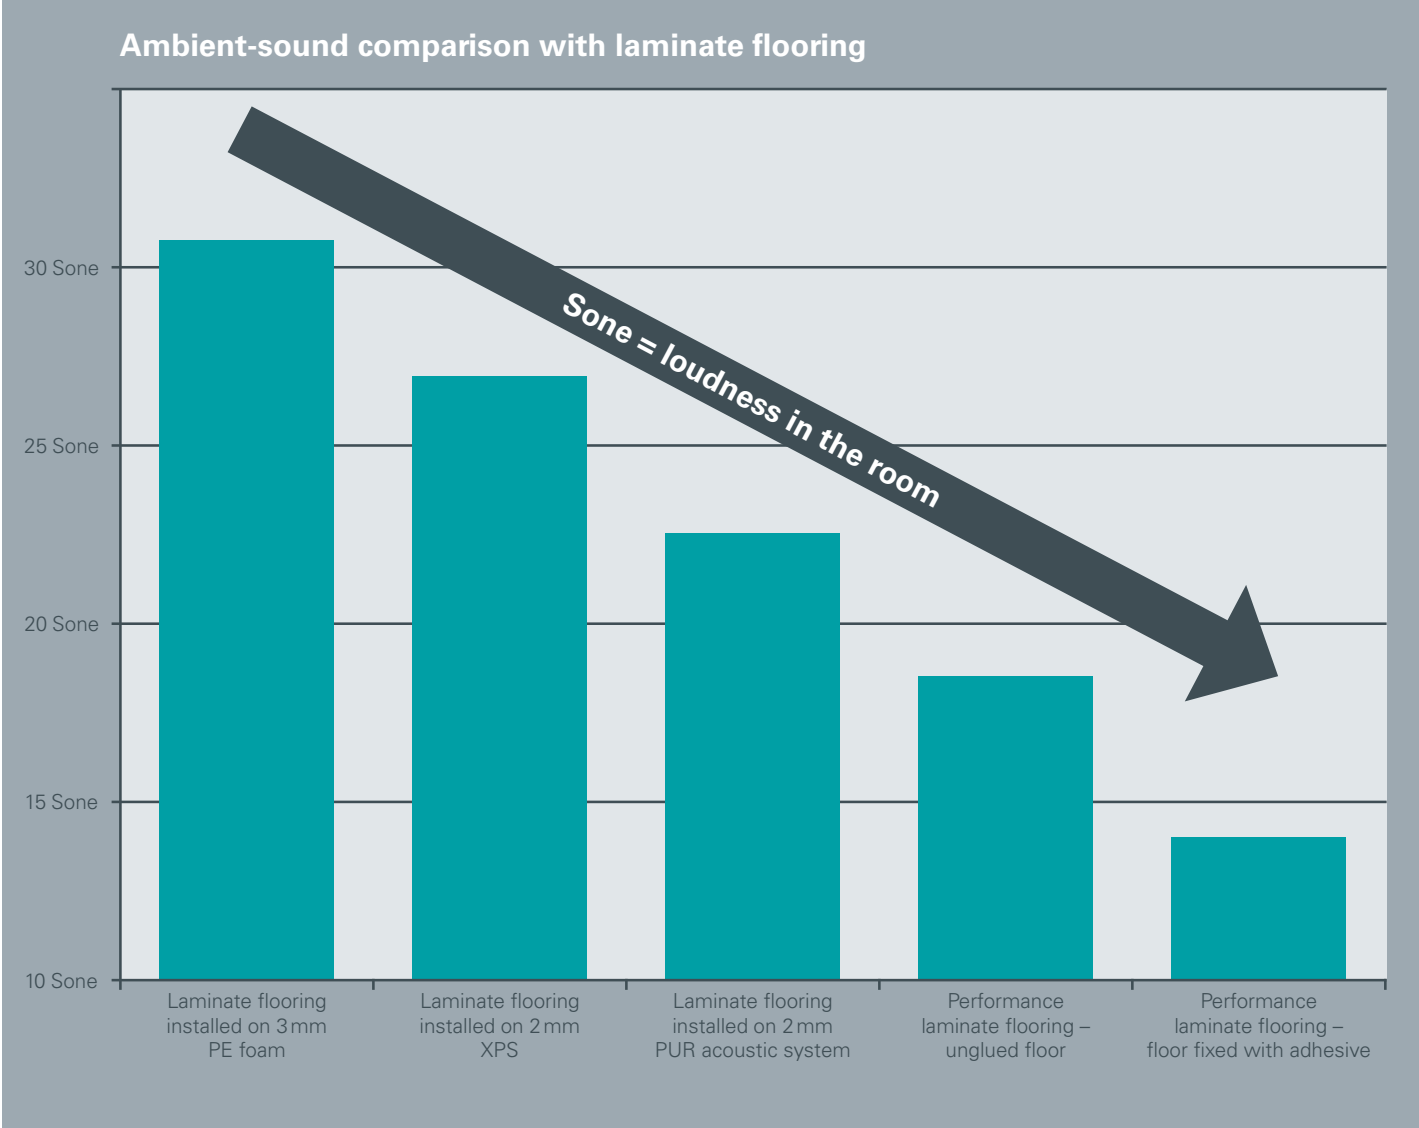

Low-resource HDF core board with new edge sealing for maximum moisture resistance.

INSTALL READY TECHNOLOGY

Already complete and ready for immediate installation thanks to its self-adhesive product backing.

- Abrasion resistance: AC5
- Utilisation class 23: Heavy-duty use in the domestic area
- Utilisation class 33: Heavy-duty use in the commercial sector
- 25-year guarantee (for private use)
- Fold-Down locking
- Authentic joint design (V4) with selected decors

Rock'n'Go is the talent show among the flooring solutions – it is extremely durable, moisture-resistant and particularly quiet.

And since it contains everything you need, you can start right away:

TECHNOLOGY THAT INSPIRES

Performance laminate flooring – Rock'n'Go consists of our best laminate flooring and the innovative Sound-Stop Layer. This layer can be installed directly onto the prepared subsurface. Because the layer is already integrated, you won't need any PE foil. That doesn't just rock; it's also exceptionally fast.

ATTRACTIVE DECOR DIVERSITY

Rock'n'Go convinces with authentic wood designs and an absolute insensitivity with regard to scratching. The floor also looks as good as it did following initial installation years later. Whether it's rustic mat, rough mat or using the new OSB structure, the planks measuring 1288 x 195 and 9 mm thick are always convincing. With the all-round V4 joint, your floor will receive a uniquely genuine-wood appearance with a strong country house flooring character.

GOOD ADVICE ALL ROUND

100% made in Germany, up to 90% certified sustainable materials and a 25-year guarantee – with Rock'n'Go you get the best laminate flooring produced by wineo so far.

MOISTURE-RESISTANT

The new Aqua-Stop technology keeps Rock'n'Go protected from liquids and moisture. Imperceptible quelling – up to four times less than with conventional flooring.

QUICK TO INSTALL

No further material needs – thanks to its Install Ready technology, Rock'n'Go is directly ready and as a result quick to install.

PARTICULARLY QUIET

Extremely quiet sound behaviour thanks to the new Sound-Stop technology. Rock'n'Go is up to 40 % quieter than conventional laminate flooring – comparable to a high-quality parquet installation.

DURABLE

Rock'n'Go is stain resistant. Even furniture or chair castors leave no traces.

EASY CARE

Thanks to the melanine resin overlays, Rock'n'Go is child's play to clean.

SUITABLE FOR WET ROOMS

Thanks to Aqua-Stop technology, Rock'n'Go is also exceptionally suited for wet rooms.

SUITABLE FOR UNDERFLOOR HEATING

Rock'n'Go can be installed without any problems onto an underfloor heating system.

UV-RESISTANT

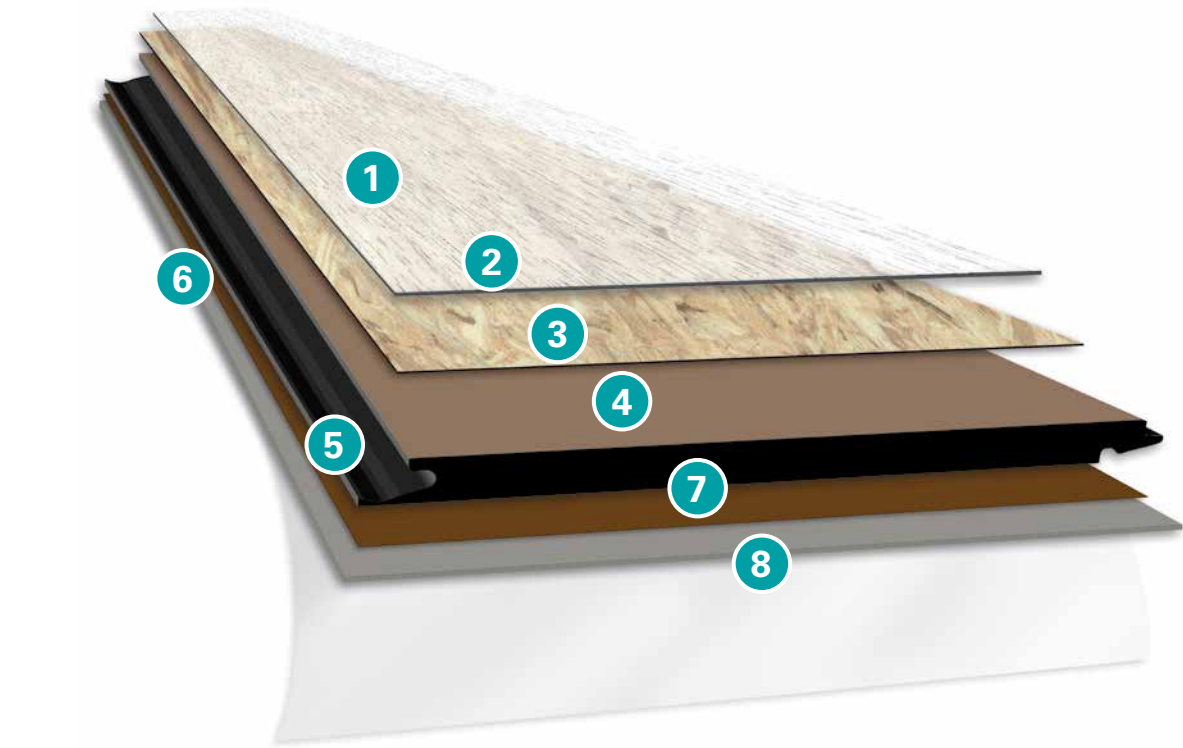

Even when exposed to sunshine, the Rock'n'Go laminate flooring does not change thanks to its high UV- resistance.

ANTISTATIC

The static charge of the surface, for example with dry room air, is reduced and dust does not adhere to the surface.

MADE IN GERMANY

1 Surface structure

Different surface embossings provide an extremely high level of authenticity.

2 Wear layer

The particularly robust melamine resin overlay is the basis for classification into the appropriate fields of application.

3 Decor

The decor paper offers a diverse range of design possibilities.

4 Core board

The highly compressed HDF core board is swell-resistant.

5 Profile connection

Thanks to its Fold-Down locking function, the product is very simple and quick to install.

6 Aqua-Stop profile seal

The innovative profile seal protects the entire sealing system from moisture and is consequently highly moisture-resistant.

7 Backing

The melamine resin backing serves to balance and guarantees high form stability.

8 Sound-Stop Layer

All products have an integrated Sound-Stop Layer including protective film. When the protective film has been removed, the former is fixed firmly to the subsurface. Consequently, both the walking and impact sound levels of the floor are dramatically reduced.

PERFECT FIT ACCESSORIES

SKIRTINGS

- decor matching MDF skirtings
- installation heights from 60 mm to 100 mm
- mounting clips and corner elements for easy installation

PROFILES

- self-adhesive and screwable profiles
- profile types for different applications

Detailed information can be found in our accessories brochure.
